# Australia - Japan Industrial Relations Bibliography

## **Abstract**

This bibliography contains references to works in English dealing primarily with Japanese industrial policy, industrial relations, the labour market, trade unionism, and associated topics including human resource management, comparative economics and investment relationships between Australia and Japan. References to internal, comparative and external studies of Japanese industrial policy and labour markets are also included. The bibliography is divided into two sections as follows: 1. Australia-Japan - Specifically deals with comparative studies of Japan and Australia, or studies carried out by Australian researchers on relevant Japanese topics; 2. General - Encompasses worldwide investigations of Japanese industrial relations and the labour market during the 1980s. Material included in this bibliography substantially post-dates 1983 and is meant to serve as an update of the Australian Department of Industrial Relations' Japanese Employment and Employee Relations - An Annotated Bibliography (Canberra, 1984). This publication is quite comprehensive for material published between the approximate period 1970-83. However it did not include unpublished theses and dissertations, and as such this omission has been partially addressed within this work.

[This bibliography was originally published in Jim Hagan & Andrew Wells (eds), *Industrial Relations in Australia and Japan*, Allen & Unwin, St. Leonards, 1994.]

## Introduction

The following bibliography contains references to works in English dealing primarily with Japanese industrial policy, industrial relations, the labour market, trade unionism, and associated topics including human resource management, comparative economics and investment relationships between Australia and Japan. References to internal, comparative and external studies of Japanese industrial policy and labour markets are also included.

The bibliography is divided into two sections as follows:

1 Australia-Japan

Specifically deals with comparative studies of Japan and Australia, or studies carried out by Australian researchers on relevant Japanese topics

2 General

Encompasses worldwide investigations of Japanese industrial relations and the labour market during the 1980s.

Material included in this bibliography substantially post-dates 1983 and is meant to serve as an update of the Australian Department of Industrial Relations' Japanese Employment and Employee Relations - An Annotated Bibliography (Canberra, 1984). This publication is quite comprehensive for material published between the approximate period 1970-83. However it did not include unpublished theses and dissertations, and as such this omission has been partially addressed within this work.

Journals and serials used in the compilation of both the present bibliography and its 1984 predecessor are listed in the Appendix.

This current bibliography includes not only published works, but also references to unpublished theses and dissertations as taken from the following sources:

- \* E. Bishop, Australian Theses on Asia: A Union List of Higher Degree Theses accepted by Australian Universities to 31 December 1970, Canberra, 1972, 35p. [Supplement, 1975].
- \* Union List of Higher Degree Theses in Australian University Libraries: Cumulative Edition to 1965, Hobart 1967. [Supplements 1966-74, Hobart 1971-76].
- \* Australian Association of Asian Studies Review (1977-92). Contains an annual listing of Australian theses and dissertations on Asian subjects. It should be noted that some of the items listed therein (and cited below) are works in progress.
- \* R.J. Stone, The Japanese employment system: an English language bibliography with selected comment, Human Resource Management Australia, 22, 3, August 1984, 60-64.

It should be noted that in regards to the term 'Industrial Policy' as applied within this bibliography, the term may refer to (i) Government policy towards industry and industrial growth, or (ii) Government or private company policy with regards to industrial relations. The latter definition has been given priority within the current work. The present Australia-Japan section of the bibliography could be further divided into 4 subject-related sections, as follows:

- 1 Industrial relations, labour markets, unions, etc. (38%)

- 2 Management (20%)
- 3 Economic issues (24%)
- 4 Non-specific Australia-Japan relationships and comparative studies (18%)
