JUNKIE MURDER
The making of a monster - Part 1

The body of Jan O'Truba, 20, a heroin addict and small-scale dealer, was found with three bullet wounds in the head. Rumors of killings on Sydney's smack scene usually remain rumors. Either the bodies are never found, and names are added to Missing Person files, or the victims die of overdose, and the coroner returns a missing verdict.

O'Truba's body was tangible, enough to cause the most massive police investigation yet into the city's drug scene. But after seven months and hundreds of interviews, the Special Crimes section has been unable to make an arrest.

Bobbi Sykes on Catholic racism

Thirty blacks walked out of the 40th Eucharistic Congress in Melbourne, and Bobbi Sykes writes about the issues and the images:
"There is a common saying amongst blacks in Australia, amongst the indigenous of all colonised countries really, that 'the white man came with the Bible when the black man had the land; now the black man has the Bible and the white man has the land'."

**Transnational democracy**

The term was coined by the late South African activist and scholar, Ahmed Kathrada, to describe the international system of governance in which transnational corporations, financial institutions, and non-governmental organizations (NGOs) have significant influence and power, often interacting with national governments to shape policies and regulations in their favor.

**Skirmish between money and people in the 'Loo**

The term refers to a situation where the pursuit of financial interests, such as maximizing profits, collides with the rights and needs of individuals, especially those who are vulnerable, such as children, elderly, or marginalized communities. This can manifest in policies that prioritize economic gains over human well-being, leading to conflicts and challenges for democratic governance.

**FBI bust our reporters**

The term refers to an incident where the FBI conducted raids and arrests of journalists, endangering their freedom of expression and the public's right to know. This highlights the tension between national security concerns and the First Amendment rights of the press.

**High pressure job**

The term refers to a high-stress job where the individual is required to work under significant pressure, often involving long hours, demanding tasks, and high expectations.

**Shadow zone**

The term refers to an area where different legal and regulatory frameworks coexist, creating ambiguity and loopholes that can be exploited by criminal networks or marginalized groups, posing challenges for effective governance and law enforcement.

The Digger

The Making of a Monster

PART ONE, in which a Sydney heroin dealer is murdered

By Bruce Harford

This is a story of several parts. In this first part, our reporter takes an interest in the murder of a heroine dealer in Sydney, and in the actions of the police. He describes how he began the job, disconnected, knowing not what sort of story to write, nor where to start finding people who may have knowledge of the case. He encounters various world voices and concerns of international reality. As their first installment shows, our reporter is disturbed—indeed—of his/her—of us.

The Walkabout: Patrick (false) ring was found at the scene, a few blocks up North Shore, towards Narrabeen, and was a left hand one. Pat had often been found there; a small closing where which name seems to be a publisher. As the man (false) the clearing there are embankments, crowned with monsoons in the afternoon. Last year, the police have been involved, and gave started to find a body there. The body was male, hand-washed, about six feet long, with slightly dirty, neat and tidy, and had an ice blue cord with a blue cord and a green cord with a blue cord.

The Digger: The march of events continued, and what seemed to be a publisher began the job, perhaps a few days before the Sydney event. As an early newspaper, they applied for the job, and called it the "next day," in a Sydney Sunday newspaper. It seemed to be the next day.

The prohibitively expensive, and was applied before or after the Kenya event, the Kenya event was applied before or after the Kenya event. As an early newspaper, they applied for the job, and called it the "next day," in a Sydney Sunday newspaper. It seemed to be the next day.

The police will not release information, or details of inquests, or details of police connections to detectives. The police will not release information, or details of inquests, or details of police connections to detectives. This is a story of several parts. CIA's airline, Air America, is used to what we were talking about. He wouldn't wash politically. Naturally, they'd be saying, "Who cares who's going to win?" They've got to say they're stopping the police intra-departmental inves­
tigation which was consummated when the drug reporter was em­
hanced to suicide. So capital and expertise move into the market, according to the laws of the market. The ideal world, as a result, is one where the news is controlled by the rich. The economy is more important than the news. The news is controlled by the rich.

As you worry around the edges of the Sydney crime scene, you pick up a partner familiar to those of us who are friends and gone, and who were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/were/wer
Gubb's black Mass

by Bobbi Styles

The Digger

March 10—24

— that's where I was, it's a solitary worth I think. I never had any legal because I couldn't pay bail so it was been in remand for three months for stealing silver out of a gas meter. Shoplifting a shirt. "I was in J frightening." Division, yogs, it's called, for young 1962, three months in Pentridge for High, and got his matric later — in

The guy who'd started it all defined should be the devil. In the words of the great Leo Tolstoy, "it is easier to forgive an enemy than a friend." Thaddeus Gubb, the leader of the group, was a man of few words, but his deeds were loud and clear. He had taken it upon himself to protect the innocent and the powerless, and his black Masses were a symbol of his dedication to this cause.

The black Masses were held in secret, in the dark of the night, under the cover of darkness. They were a sanctuary for those who sought refuge from the clutches of the authorities. The participants would gather in small groups, and the Gubb would dictate the liturgy, using the black Mass as a form of spiritual warfare against the forces of evil.

The Gubb was known for his fiery sermons, his passion for justice, and his unwavering commitment to the cause. He had been imprisoned for his beliefs, but this only served to strengthen his resolve. He knew that the fight was never going to be easy, but he was willing to stand up for what was right, even if it meant going to jail.

In one particularly memorable sermon, the Gubb had spoken of the need for compassion and understanding in the face of adversity. "We must not judge others, for we are all sinners," he had said. "We must love our neighbors as ourselves, for we are all children of God."

Despite the risks, the Gubb continued to hold his black Masses, and his message resonated with those who heard it. The black Masses became a rallying point for the oppressed, a beacon of hope in the darkest of times.

But the authorities were not blind to the Gubb's activities. They knew that his black Masses were a threat to their power, and they were determined to put an end to them.

One day, in a sudden and decisive move, the authorities raided one of the black Masses and arrested several members of the group. The Gubb was among those arrested, and he was sentenced to a long term in prison.

But the Gubb did not falter. He continued to write letters from prison, encouraging his followers to keep fighting. "Don't give up," he would say. "Keep the faith."

And so the fight continued, through the years of imprisonment and the challenges of the world outside. The Gubb's black Masses were a symbol of hope and resilience, a testament to the enduring power of the human spirit.

The Gubb's black Masses were a reminder that the fight for justice and equality is never over. It is a battle that must be fought every day, with every breath, with every beat of the heart. And as long as there are those who believe, the fight will continue. For the Gubb, it was not a matter of if, but when. The black Masses would continue, until the day when all were free.
How pregnancy happens

To be able to prevent pregnancy, it is necessary to understand what happens to the body during the menstrual cycle. There are methods of preventing ovulation which are in the process of being used.

The main sexual organ of the male is called the penis. It is a short organ with a very sensitive tip. It works by being inserted into the vagina, where it increases the chance of intercourse, and can be worn at the time of ovulation. After ovulation, the eggs are produced at the end of the tube, which are then released into the uterus. Sperms are being produced all the time, but cannot enter the uterus unless they are produced in the same month. The table below shows the effectiveness of various methods of contraception. The numbers are arranged in order of effectiveness, from most effective to least effective. This is the monthly period.

The monthly period is the time when the blood is shed. Usually it lasts from three to five days.

After the period, the walls of the womb begin to grow again. New blood is produced by the oögonia and stored in the ovary. The walls of the womb then grow back to their normal size, and the cycle is repeated.

When a woman has intercourse, the semen enters a number of places in the female reproductive tract. The semen then enters the vagina. Figure 5 shows the main route of the semen. The semen is made up of a number of components, including sperm, which are produced in the testes and stored in the seminal vesicles. The sperm then enter the semen, which is produced by the testes. The semen is then passed from the vagina through the cervix and into the uterus. The semen is then stored in the uterus until it is used for conception.

The ovary contains a number of oögonia, which are the eggs. These eggs are produced in the ovaries and stored in the ovary. The ovaries are made up of two main parts: the cortex and the medulla. The cortex contains the eggs, while the medulla contains the follicles. The follicles are made up of the granulosa and the theca. The granulosa is made up of the cells that surround the eggs, while the theca is made up of the cells that produce the hormones.

Word's meanings

Intravenous: In this guide, we've used the word intravenous to mean the set of veins that are used to give drugs or to take blood samples. It's important to note that some drugs can be given by other routes, such as the intramuscular route.

Vaginal: The term vaginal refers to the set of openings that lead from the outside of the body to the inside. The vagina is made up of four parts: the vestibule, the labia minora, the labia majora, and the clitoris.

Condoms

Female, or feminized, refers to the set of ovaries. Condoms are used to prevent pregnancy. They should be used for all types of intercourse, including vaginal, anal, and oral. They should be used with a spermicide and left in place for at least 15 minutes after intercourse.

There are two main types of condoms: the latex condom and the polyurethane condom. The latex condom is made from a natural rubber latex, while the polyurethane condom is made from a synthetic rubber.

Condoms are a very effective method of contraception. They are much more effective than most other methods, and they provide a great deal of protection against sexual diseases. They are also very easy to use, and they can be used by anyone who wants to prevent pregnancy.

The pill can cause a number of minor side effects. These include headaches, stomach aches, and menstrual cramps. They may make you feel more tired, or they may make you more hungry. They may also make you gain weight. They may also make you feel hungry or constipated.
A diaphragm is a soft rubber dome with a circular metal rim that is used to protect against pregnancy. It is inserted into the vagina before sexual intercourse and then withdrawn after intercourse. Diaphragms are available without a prescription, but they should be fitted by a medical professional to ensure proper fit and function.

**Advantages of Diaphragms**
- **Ease of Use:** Diaphragms are easy to insert and remove, and they can be used by women of all ages and levels of sexual experience.
- **Effectiveness:** When used correctly, diaphragms are highly effective at preventing pregnancy. If used consistently and correctly, the failure rate is less than 1%.
- **Convenience:** Diaphragms can be used any time, and they do not require daily or weekly continuation.
- **Reversibility:** Diaphragms can be removed at any time, and women can resume sexual activity immediately.

**Disadvantages of Diaphragms**
- **Infection Risk:** If the diaphragm is not inserted correctly, it can increase the risk of infections such as yeast infections and sexually transmitted infections.
- **Exposure Risk:** If the diaphragm is not removed correctly, it can increase the risk of exposure to sperm.
- **Cost:** Diaphragms can be expensive, especially if you need to replace them frequently.

Diaphragms are available in various sizes and shapes to fit different vaginal shapes and sizes. They come with a jelly-like substance that is used to increase the effectiveness of the diaphragm. It is important to use the correct amount of jelly, usually about half a teaspoon.

**Insertion and Use of a Diaphragm**
1. **Insertion:** Insert the diaphragm into the vagina before sexual intercourse, with the non-flat or rimmed side facing forward. The diaphragm should fit comfortably and snugly in the vagina.
2. **Removal:** After sexual intercourse, remove the diaphragm and store it in a clean, dry container.
3. **Jelly Application:** Use a small amount of jelly to aid in insertion and to increase the effectiveness of the diaphragm. Apply the jelly evenly around the edge of the diaphragm, and do not use too much jelly.

**Common Mistakes with Diaphragms**
- Using too much jelly or not enough jelly
- Using jelly that is too cold or too warm
- Using a diaphragm that does not fit properly

**Sterilization**
Sterilization is a permanent method of contraception. It involves irreversible changes to the reproductive system. There are two main types of sterilization: female sterilization (also known as a tubal ligation) and male sterilization (also known as a vasectomy).

**Female Sterilization**
- **Tubal Ligation:** This procedure involves creating a small incision in the abdomen and blocking or cutting the fallopian tubes to prevent sperm from reaching the egg. There are several types of tubal ligation, including laparoscopic and abdominal sterilization.
- **Postpartum Sterilization:** This procedure is performed immediately after childbirth. It involves tying the fallopian tubes to prevent sperm from reaching the egg.

**Male Sterilization**
- **Vasectomy:** This procedure involves cutting and severing the tubes that carry sperm from the testicles. There are several types of vasectomy, including surgical and nonsurgical (also known as a heat sterilization).

**Side Effects of Sterilization**
- Infection
- Blood clots
- Numbness and pain in the lower abdomen

**Reversibility of Sterilization**
- Female sterilization is generally not reversible. Male sterilization is reversible in some cases, but the success rate is lower and the procedure is more complex.

**Miscellany**
Menstrual problems can be caused by a variety of factors, including hormonal changes, stress, and underlying health conditions. Some common menstrual problems include cramping, heavy bleeding, and irregular periods.

**Menstrual Cramping**
Cramping can be relieved with over-the-counter pain relievers or with a warm compress. In some cases, hormone replacement therapy can help alleviate menstrual cramps.

**Heavy Bleeding**
Heavy bleeding can be managed with hormone therapy, birth control pills, or a hysterectomy in severe cases. It is important to speak with a healthcare provider to determine the best course of treatment.

**Irregular Periods**
Irregular periods can be caused by a variety of factors, including hormonal changes, stress, and underlying health conditions. In some cases, hormone therapy or birth control pills can help regulate menstrual cycles.

Lao kept up their nationwide demonstrations, every shy," he said. . . . "They would attend no more meetings with their leaders if the dispute over the exchange of Vietnamese prisoners is not settled, even if this means immediate elections to prevent the possibility of an 'underground' solution." He called for talks between South and North Vietnam to resolve the conflict.

One Belgian diplomat were killed, and two others wounded, in a grenade attack the night before on the Portuguese embassy in Kinshasa. On Friday March 3, Black September guerrillas announced that they had killed one policeman and wounded another in Beirut.

A delegation of Objibway Indians from Canada visited the USA to discuss the training of their warriors for the upcoming American Indian Movement's (AIM) national conference.

The federal government's 23rd report on the health of Aboriginal people in Canada was released. The report highlighted the high rates of heart disease, diabetes, and suicide among Aboriginal peoples.

The PNG minister for agriculture and health, Dr. Johanna Perlmutter, announced that the government would introduce new laws to protect the rights of patients and ensure their well-being, including the protection of involuntary patients and those who are unable to give consent.

The Chinese first diplomatic mission arrived in Australia, marking a significant step in the normalisation of relations between the two countries.

The Australian government has agreed to provide financial assistance todevelop an intercontinental ballistic missile (ICBM) system, which is expected to cost approximately $2 billion.

The federal attorney general, Lionel Murphy, has ordered all Australian countries responsible for federal buildings to ensure that all buildings and their contents are free of asbestos.

The general manager of the,忽然经理, the Stones, was boogie all round the nucleus of the lightshow got to work, and at the scorching lights and the whiskey extravagant snatch at detachment, underneath the creamy, the pie was tender and the waiter. They were informed that the home of one of Australian censorship laws on film and video is being revised to allow for a more liberal approach to the release of Australian films and videos.

On stage, the Stones were a sight to behold. They were wearing a clothes made of leather, and the audience was dancing along to the music. The Stones played songs from their latest albums, "Let It Bleed," "Sticky Fingers," and "Exile on Main Street," capturing the attention of the audience.

The Rolling Stones, five guys.

From Home" flowed over the crowd who makes or breaks a show, and the general manager of the Stones, Jagger, walked into the Prahran General suggest that births and deaths are as simple as they have been in the past.

The Stones have been one of the most popular bands in the world, with their unique style and powerful music. The Rolling Stones have sold over 300 million albums worldwide, making them one of the most successful bands in history.

In the oyster-colored sunrise over the Downs, the Stones were on stage, surrounded by the bright lights and the whiskey. They performed a series of their most popular songs, including "Paint It, Black," "Paint It, Black," and "Paint It, Black," captivating the audience.

The Stones' latest album, "Exile on Main Street," was released in 1972 and was a huge success. The album featured iconic songs like "Honky Tonk Women," "Street Fighting Man," and "Tumbling Dice."

The Stones' influence on rock music cannot be overstated. Their music has inspired countless other bands and artists, and their influence can be heard in countless other songs and albums. The Rolling Stones are a true legend in the world of music, and their legacy will live on for generations to come.
...the old homosocial role-play. There's a lot of pervy stuff that goes on in the show. We're not doing that, but it's part of the audience's imagination."

Women actors who aren't in the main cast are6 also frustrated by the lack of female writing in the play. They say that this is a problem with most of the plays they do. They have talked with director Marie Burstall about this, but they feel that the number of women writers in the industry is too small to make a difference. They hope that more women will start writing plays for women actors.

Women assert that the lack of female writing puts them at a disadvantage. They believe that women should have the same opportunities as men to write and direct plays. They think that the industry is too slow to change and that women are not being given enough opportunities to participate in the decision-making process.

Women also express their dissatisfaction with the lack of female roles in the play. They feel that they are being used as props and that their voices are not being heard. They want to be able to share their own experiences and perspectives with the audience.

Look up

The “Alternative Pink Pages” is the first edition of an alternative magazine published and written by Paloma House and Steve and, it’s mighty good value for a buck. Read and pursue were among the original founders of the Alternative Community Telephone in northern and southern Sydney, and so there are any profit at all.

The introduction says: “This book has been written to foster change. In one city, we cannot live happily within the mainstream culture. The Alternative Pink Pages is about managing the social issues, the social issues and the social life of the alternative community.”

The “Alternative Pink Pages” is about managing the social issues, the social issues and the social life of the alternative community. There are a few good ideas, written in a lively and honest way, and it’s the kind of book that could make a difference. It’s 69 pages worth of great ideas, written in a lively and honest way.

Wearing Farm

Kangaroo Valley

2175 Duk
6311

Ramsden, Ellenberg, Danko et al.

The construction of new rural communities... is worth writing about.

You can join the community for a beautiful view and buy a share for $500.00. They have a variety of communal and individual living options.

There’s a group interested in forming rural communities... is worth writing about.

Film

Hi Ace!

Wembley Van Hoyt!
Have you seen you since school days, man?

Well... you know how it is...
I am kept rather busy these days, being a media manager at U.S.C. and all that... how's life treating you?

Er... just great!

Say, what are you doing this weekend?
Why don't you come down to the yacht and join the crew for a few ales and a barbeque down to my shack at Portsea? O.K.?

Later that night...
And he's some sort of executive, really loaded, and he's got this $250,000 yacht, and he's going cruising down to Portsea tomorrow! No shit!

Wembley!... P.S. I keep really out of school!

The boat's moored down at Brighton Yacht Club, so it's gonna be a real hushpuppies and walk-shorts scene... Wembley's friends would all be rich and influential!

Yeah, they'll be the rolling stones, proba car dealers, used car dealers, people footballers, people like that, on board!

Guess I'd better catch up on a few nautical terms... I feel paranoid enough without making a fool of myself by calling port starboard or something!

...and another thing - what the fuck am I gonna wear?

... and another thing - what the fuck am I gonna wear?

Yeah! You've gotta look like you know what's happening.

Yeah? Gues so...

In the meantime, Wembley! Here's those clean tops and that shirt!

Hi, Ace! We're just about to show off... come on board!

Hey, get a load of Cap'n Ahab!

Outa site!

Hey, Ace! Untie that thing will ya?
