A NEW MODULAR PROGRAM UPGRADE YOUR TEACHING SKILLS

The **Introduction to Tertiary Teaching** subject (ITT) will be offered as a modular staff development program in Spring semester. New members of academic staff who are required to complete the ITT should find the subject flexible and relevant to their own professional development. Staff who are not required to complete the subject may choose to complete individual modules or the complete program over an extended time period. The ITT subject is an approved 8 credit point course in the Faculty of Education schedule and is offered free of charge to University staff. Staff may decide to participate in the staff development component only or to complete formal assessment tasks for credit to EDGA997. Completion of the ITT staff development program is through 7 core and 2 elective modules.

Core modules are:

- What is Teaching? What is Learning?
- Assessing Student learning
- Using Technologies for Teaching
- Monitoring and Evaluating Teaching
- Planning and structuring learning for Small Groups
- Planning and structuring learning for Large Groups
- Evaluating and Designing Curriculum

Elective modules are being developed and at this stage include:

- Teaching Information Literacy Skills
- Teaching International Students
- Teaching in Laboratories
- Teaching in the Field
- Supervising Post Graduate Students

After completing the ITT subject staff may enrol in the Graduate Certificate of Higher Education. This course requires the study of two additional subjects; *Curriculum & Instructional Design* and *Assessment & Evaluation*. Staff may then proceed into the Graduate Diploma in Adult Education and Training and a Master of Education degree if they so desire. Several have already taken these courses and graduated from the Faculty.

Information is available from Maureen Bell, Faculty of Education, phone 3946.
