The NSW AIDS Resource Distribution Formula: 2008 Review

Final Report

Centre for Health Service Development

March, 2010
Acknowledgements

The Centre for Health Service Development would like to gratefully acknowledge the numerous individuals and groups who contributed to this study. We would particularly like to thank the following for their support and guidance:

- The AIDS-ROF 2008 Review Advisory Committee (ARRAC)
- The Ministerial Advisory Committee on HIV and Sexually Transmissible Infections (GAS)
- The NSW HIV/AIDS & Related Program Managers’ Network (HARPM)
- The Ministerial Advisory Committee on Hepatitis (MACH)
- AIDS Infectious Diseases Branch, NSW Department of Health also provided assistance to the project team in the interpretation of the data received and understanding the context for the AIDS-ROF
- The NSW Department of Health and Caridata staff who were so helpful in extracting data according to our specifications
- Mr John Ward, Senior Policy Analyst - AIDS/Infectious Diseases Branch, NSW Department of Health

# Table of Contents

**EXECUTIVE SUMMARY** ............................................................................................................. 1  
1 **INTRODUCTION** ...................................................................................................................... 4  
2 **BACKGROUND** ........................................................................................................................ 5  
   2.1 The Resource Distribution Formula in NSW ........................................................................... 5  
   2.2 International applications of a Resource Distribution Formula ............................................. 3  
   2.3 The NSW AIDS-RDF ............................................................................................................ 3  
3 **METHODOLOGY** ...................................................................................................................... 8  
   3.1 Overview of the project methodology ..................................................................................... 8  
   3.2 Data sources investigated ....................................................................................................... 8  
      3.2.1 Issues in sourcing and preparing data for analysis ............................................................. 9  
      3.2.2 Variables estimating population need ............................................................................. 13  
      3.2.3 Measures of service activity .......................................................................................... 13  
      3.2.4 Data sources selected for testing ................................................................................... 14  
   3.3 Developing the models ......................................................................................................... 15  
   3.4 Combining the population elements ...................................................................................... 15  
   3.5 Specific issues addressed during the modeling process ......................................................... 16  
      3.5.1 Health service areas ........................................................................................................ 17  
      3.5.2 Unit of counting .............................................................................................................. 17  
      3.5.3 Session type to count ..................................................................................................... 17  
      3.5.4 Testing and screening ..................................................................................................... 21  
      3.5.5 GP s100 prescriber activity ............................................................................................ 21  
      3.5.6 Population weights ......................................................................................................... 22  
      3.5.7 Cross-Area flows ............................................................................................................ 22  
      3.5.8 Distribution of needles and syringes by pharmacies ....................................................... 24  
      3.5.9 Antiretrovirines ................................................................................................................ 26  
4 **RESULTS** ................................................................................................................................ 27  
   4.1 Notifications .......................................................................................................................... 27  
   4.2 The HIV population element of the AIDS-RDF .................................................................... 28  
   4.3 The STI population element of the AIDS-RDF .................................................................... 30  
   4.4 The NVP population element of the AIDS-RDF .................................................................. 32  
   4.5 The Hepatitis C population element of the AIDS-RDF .......................................................... 34  
   4.6 Combined population elements for the AIDS-RDF ............................................................... 35  
5 **DISCUSSION AND RECOMMENDATIONS** .......................................................................... 37  
   5.1 Data for the RDF models ...................................................................................................... 37  
   5.2 Specific components ............................................................................................................. 38
