

# MEETING REPORTS

MAY

**Speaker:** Mrs June Pronk: The Battle for Illawarra Escarpment

June Pronk outlined the problems and hopes dealing with the whole management of the Escarpment with its extremely important ecological, scenic and stability/fire issues, whose authorities seem to be somewhat unaware of their total responsibility to the environment and the community.

A thirty minute video, which had been produced as part of the Coalitions' submission to the Commission of Inquiry, was shown to demonstrate the broader issues such as land stability, downstream problems after storms, flora and fauna conservation and visual impact. This was well received and a lively discussion followed.
