ABSTRACT

The problem of concern in this study is of a dual nature, involving music education principles and ethnomusicological issues. Using Philippine music and dance as the specific genre, the study investigates approaches to the learning of non-Western music at the secondary school level. The study identifies two approaches which may lead to the Philippine music and dance learning experience, designs curricula in two appropriate forms, and, finally, sets up conditions to test empirically the relative effectiveness of the curricula.

The initial task for this study was to locate and collect Philippine music and dance data, by means of field work, during which the researcher acted as participant and observer in Philippine events. From this data, the study attempted to design, implement and evaluate Philippine music and dance curricula in two forms, with both curricula developed from identical music and dance materials and principals.

The first form, Curriculum A, is a fifteen hour curriculum which presents the music and dance as entities in themselves, worthy of study in their own right. The second form, Curriculum B, is a fifteen hour curriculum in a cross-disciplinary form, seeking relationships between music, dance and socio-cultural variables.

Following the development of the curricula, selected teachers were prepared to implement one or other of the randomly assigned curricula forms with 521 Year 8 and Year 9
pupils in a stratified random sample of New South Wales secondary schools. The sample was stratified according to four school-related variables, five teacher-related variables and three pupil-related variables.

Finally, this study attempted to evaluate the relative effectiveness of the two curricula by devising one Philippine music and dance achievement test. The test evaluates pupils in the areas of knowledge and skills in Philippine music and dance. The test also seeks pupils' attitudes towards Philippine music and dance in particular, and non-Western music and dance in general. Analysis of variance was employed to establish the more effective curriculum form, and to ascertain the effects of selected intervening variables upon the two Philippine music and dance curricula.
ACKNOWLEDGEMENTS

It is with a deep sense of gratitude that I acknowledge the continual assistance and advice given by my supervisor, Professor R. C. King, whose expert guidance facilitated the completion of this study.

I am indebted to Dr. J. Jones, of the University of Wollongong, for her willing assistance, understanding and constant encouragement.

Sincere and grateful appreciation is expressed to the numerous Filipinos who assisted me over the years in the search for Philippine music and dance data, especially Dr. L. R. Kasilag, Dean C. S. Maceda, Dr. P. C. Belmonte, N. McGregor, R. Pfeiffer, N. Cuenco, R. and A. Brackenreg, A. Funtilla and I. Ocampo.

It is with the most sincere appreciation of the time involved that I acknowledge K. Rayner for her excellent work in typing this study.

I express my deep appreciation and gratitude to J. and S. Butchard, for their thoughtfulness and willing co-operation, especially their invaluable assistance given while preparing multiple copies of this study.

For the recording of the music for this study, and for several other forms of assistance, I extend sincere gratitude to J. Terry and N. Smith.

A great debt is owed to the principals, schools, teachers and pupils involved in the experiment of this study; very special appreciation is expressed to the participating teachers. My gratitude is also expressed to the marking team and to S. Harrison of the University of Wollongong.
Computer Centre.

To my brother, A. Brennan, I express my deepest appreciation for his constant support, genuine interest, encouragement and willing assistance.

My greatest debt is to my mother, without whose consideration, support, generosity and total commitment to my work, this study would never have been completed.

DISCOGRAPHY
LIST OF FIGURES

2. 1 Anthropology and related fields.
2. 2 Signs used in transcription, especially when using traditional Western notation.
2. 3 Thai song *Ngarm Saeng Duen* in cipher notation.
2. 4 Rhythms for Javanese rice pounding activity.
2. 5 Philippine song *Bigan* (excerpt): handgraph transcription.
2. 6 Graph transcription of a Maori *haka* dance song.
2. 7 *Matjapat* song (excerpt): melodic contour and Western notation transcription.
2. 8 Korean *Arirang* in *yul-chap-po* notation.
2. 9 Javanese *kraton slendro* notation.
2.10 Schematic representation of the relationship between four scales, with intervals expressed in 'cents'.
2.11 Outline of pitch and rhythm and their inter-relationships.
2.12 The Hood chart for analysis of style.
2.13 Pictorial model of music learning.
2.14 Component parts of music curriculum design relative to their role in the design.
2.15 Flow-chart of music curriculum design.
3. 1 Frequency of pitches, expressed rhythmically, for *Binalig*.
3. 2 Tribal scales and frequency of pitches, expressed rhythmically, denoting principal tone.
3. 3 Moro scales and frequency of pitches, expressed rhythmically, denoting principal tone.
3. 4 Representative spread of curricula Tribal, Moro and Christian instruments.
3. 5 Curricula content - Tribal - across eight music activities.
3. 6 Curricula content - Moro - across eight music activities.
3. 7 Curricula content - Christian - across eight music activities.

3. 8 Occurrence of music activities in curricula lessons.

5. 1 Areas tested and items of the test.
LIST OF TABLES

2.2 Percentages of school pupils from non-English speaking backgrounds.

4.1 School-related variables and pupil frequencies.

4.2 Teacher-related variables and pupil frequencies.

4.3 Pupil-related variables and pupil frequencies.

5.1 Standard error of the mean for test Questions.

6.1 Raw test scores having highest frequency distribution.

6.2 Frequency distribution for raw score totals.

6.3 Raw score test means for Curriculum A and Curriculum B.

6.4 Class cells above and below raw score test means.

6.5 'Success' of one curriculum over the other for 67 test items.

6.6 Class groups gaining full score or zero score for test items.

6.7 Number of test items receiving zero or full scores.

6.8 Analysis of variance: the independent variables, Curriculum A and Curriculum B.

6.9 Raw score test means: Curriculum A and Curriculum B, and social class.

6.10 Analysis of variance: Curriculum A/B and social class.

6.11 Raw score test means: Curriculum A and Curriculum B, and urban/rural schools.

6.12 Analysis of variance: Curriculum A/B and urban/rural schools.

6.13 Raw score test means: Curriculum A and Curriculum B, and co-educational/single-sex schools.

6.15 Analysis of variance: Curriculum A/B and teacher experience.
6.16 Raw score test means: Curriculum A and Curriculum B, and teacher use of non-Western music.
6.17 Analysis of variance: Curriculum A/B and teacher use of non-Western music.
6.18 Raw score test means: Curriculum A and Curriculum B, and teacher familiarity with Asia.
6.20 Raw score test means: Curriculum A and Curriculum B, and pupil sex.
6.21 Analysis of variance: Curriculum A/B and pupil sex.
6.23 Analysis of variance: Curriculum A/B and Year 8/9.
6.24 Raw score test means: Curriculum A and Curriculum B, and pupil intelligence.
7. 1 Frequency of pupil responses to Question 12 (Attitudes).
7. 2 Frequency of pupil responses for each item in Question 12 (Attitudes).
7. 3 Pupil attitudes to two specific items.
7. 4 Pupil attitudes towards Tribal, Moro and Christian Philippine music.
7. 5 Attitudes of boys to dance, as ascertained by responses to dance items.
8. 1 Mean frequencies of successful curriculum test responses to Questions 1 through 10 for Christian, Tribal and Moro music and dance.
8. 2 Percentages of successful curriculum test responses to Question 11 for Christian, Tribal and Moro music and dance.
8. 3 Variables significantly affecting the types of Philippine music and dance.
8. 4 Analysis of variance: most highly significant groups of variables in relation to the three types of Philippine music and dance.
