Council Meetings Opened To Students & Staff

At the first meeting of the newly-constituted University Council on August 8, members resolved that Council meetings should be open to students and staff.

However, because of the restricted accommodation in the present Council Room, members decided that the number of observers should be restricted to ten. They would be admitted on a first-come, first-serve basis.

Council reserved the right, when the necessity arose, to close meetings. It has requested its Agenda Committee to recommend which items of business should be considered in closed session.

Council also resolved that a list of agenda items should be circulated to those persons who receive a report of its meetings. These are: Academic Senate members, faculty chairmen, departmental chairmen, administrative division heads, S.R.C. president, University Union secretary/manager, and the University librarian.

Council decided that, in future, reports of its meetings, circulated as above, should state that they are a record of the proceedings, as in the minutes, with the exclusion of confidential items.

VISIT BY CHANCELLOR

The Chancellor, Mr. Justice Hope, visited the University on August 28. He sat on the campus for the purpose of meeting with representatives of some of the groups that constitute the University community. These groups included senior University officers, industrial groups and student bodies.

During the afternoon, the Chancellor inspected the campus and met with theputy Chancellor, Mr. D.E. Parry.

STAFF PROFILE

Dr. Bevan Jones, 28, recently took up duties as lecturer in the Department of Electrical Engineering. He holds the degrees of Bachelor of Science, Bachelor of Engineering and Doctor of Philosophy from the University of Sydney. For his doctorate, Jones carried out research on a 30 MHz aperture synthesis radiotelescope.

Following the completion of his Ph.D., he spent a year as a Research Fellow at the University of Sydney working on Instrument Landing Systems. Following this Dr. Jones was at the Max-Planck-Institut für Radioastronomie in Bonn, Germany, for two years where he worked on the design of equipment for recording Pulsar signals received by the 100 m telescope at Effelsberg near Bonn.

Before returning to Australia, he worked for a short time at the Raman Institute Bangalore, India, on the design of a large low-frequency radiotelescope.

At present he is teaching a course on electrical transmission and communication 4th-year students. His main interests lie in the areas of antennas, communications, and high frequency electronics.

AUSSIE NORM

Funny, I'd always thought efts were baby newts...
STATEMENT BY BEAZLEY

Hereunder is a copy of a statement released by The Honourable Kim Beazley, M.P., Minister for Education, on August 20.

"As you will have noted from the Treasurer's speech last night, education remains a major priority of the Australian Government. There is to be, in fact, a moderate increase over the funds provided last financial year in the Australian Government's outlays on education in 1975-76. Let me stress that the areas of great need in education - disadvantaged schools, migrant and aboriginal education, the education of handicapped children, for example - will still be given high priority.

The Australian Government will continue the process of upgrading and improving educational facilities and educational opportunities, a task it began as soon as it came to office in December, 1972. But this will depend on the States and non-government education authorities effectively using the funds we provide. In the past 18 months some State government authorities seem to have concealed or misrepresented the very valuable improvements which have come about in education since December 1972 - improvements which would not have been possible without increased Federal funding.

Estimated expenditure in 1975-76 on the programs of the four advisory Commissions in education will account for an outlay of $1410 million, compared with $1326 million last year. Total estimated expenditure on education by the Australian Government for 1975-76 is $1908.2 million - an increase of $237 million on last year's actual expenditure.

The allocations of the four advisory Commissions - for schools, universities, colleges of advanced education and technical and further education colleges - will again be indexed to maintain their values against cost increases. This year's budget includes an allocation of $70 million as initial provision for this purpose. The Government cannot see its way clear to implementing all the initiatives recommended by the four Commissions in their recent reports, but we will ensure that the impetus of the improvements which have come about because of the initiatives already taken in education is maintained. The general economic situation means that we must defer some initiatives, and this is why we are not treating the calendar year 1976 as it ordinarily would have been treated - as the first year of a triennial period.

But while there must be deferral of some initiatives, and while new capital projects must be limited to those demonstrably essential, the Government wishes to make its intentions clear.

It is intended that: expenditure be continued on capital projects already begun; recurrent expenditure be continued so that existing standards and staff/student ratios are maintained; and the present proportion of each age group going on to tertiary education be maintained.

I want to make it quite clear that this special approach to 1976 in no way represents a rejection of the principle of triennial planning for education. It is simply a postponement of the start of the next triennium by one year. The four advisory Commissions will now report by next March for the resumption of triennial planning.

Estimated capital expenditure on education in 1975-76 is: $145 million for schools in the States; $92 million for colleges of advanced education; $45 million for universities; $31 million for technical colleges; and $46 million for government and non-government schools in the A.C.T. and the Northern Territory.

All the Commissions will need to pay special regard to problems of capital expenditure. Clearly, Australian Government funding should not bid against itself in competing programs for building materials and the labor force - a grossly inflationary action destructive of the program. The Commissions must carefully scrutinize their proposed building programs to maximize the effectiveness of capital expenditure and minimise wasteful competition.

It is worth recalling that in 1973 the Karmel Report, Schools in Australia, responsible for the upgrading and improvement of schools which is now going on, said that restraint ought to be applied to large scale commercial building, which should have lower priority than buildings for essential community services. The States have not used their Constitutional powers to bring that about. The cost of school buildings is
rising sharply. The Government has made a deliberate choice to reduce competitive pressure for capital construction pending resumption of triennial funding in 1977.

"And there has been a similar decision to maintain recurring expenditure to ensure employment of teachers and continue all the educational initiatives apart from building projects.

"I shall be making a more detailed statement to the Parliament as soon as possible. I shall also be making a separate statement on student assistance."

**VISITING PROFESSOR IN DEPARTMENT OF GEOGRAPHY**

Professor James B. Lindberg is presently visiting the Department of Geography. He will be at the University for three months from the beginning of August. Professor Lindberg is Professor of Geography at the University of Iowa.

Professor Lindberg has had a varied career, having held positions in commerce, government and in universities.

Between 1951 and 1959, Professor Lindberg was a market analyst with Standard Oil of Ohio; a supply officer on active duty with the U.S. Air Force in Western Europe (rising to the rank of Captain); a petroleum economist with Pan American Petroleum Corporation, Tulsa, Oklahoma; and a summer lecturer at the University of Manitoba.

From 1960 he has been an instructor, an assistant professor, an associate professor and now a professor in the Department of Geography, University of Iowa, Iowa. In 1967 he was a special visiting lecturer in the Department of Geography at Monash University.

Professor Lindberg is an Economic Geographer specializing in Industrial Location and in Energy Economics, especially patterns of energy use. With the recent emergence of United States energy difficulties, he has been asked to serve on a variety of University and Governmental Committees dealing with energy problems, both long-range and short-range.

From 1972 to 1974, he served on the Special Energy Advisory Committee to the Governor of Iowa and continues to serve as a consultant on energy matters to the State of Iowa.

In 1973-74, he chaired the Task Force on Energy for the Governors Conference on Iowa in the Year 2000. This was one of the earliest efforts in the U.S. to have the citizens of a state look systematically at their future. Together with Professors in Law, Engineering, and Social Psychology he was instrumental in developing a new interdisciplinary, team-taught, University course entitled Energy in Contemporary Society.

During his stay at Wollongong, Professor Lindberg will lecture on U.S. Energy Problems and also lecture and conduct seminars on contemporary trends in University level geographic education. He has been active in a new program in the United States to improve the training of University teachers of geography.

**COMPUTER MANAGER ELECTED CHAIRMAN OF UNIVAC USERS’ GROUP**

The Computer Manager, Mr. Geoff Hamer, has been elected as Chairman of the Univac Users' Association of Australasia (1100). The Association holds regular meetings to exchange software and experiences relating to the Univac 1100 series.
ACCREDITATION OF COURSES IN PSYCHOLOGY

The Council of the Australian Psychological Society, at its recent meeting on August 16, granted full accreditation for the purposes of:

1. Membership to The University of Wollongong graduate programmes for the masters and Ph.D. degrees in psychology, and

2. Associate Membership to The University of Wollongong undergraduate programmes in psychology in the following categories:

   (i) An approved course of four years' duration leading to a single qualification:
       B.A. (Honours);

   (ii) A course which consists of an approved sequence of three years which would enable the requirements of the By-laws for Associate Membership to be met if the course is supplemented by an approved fourth year:
       B.A.;

   (iii) Approved fourth year courses comprising one full year equivalent of study:
       M.A. Qualifying.

The effect of this decision is that graduates from The University of Wollongong in psychology will be eligible to apply for associate membership and for full membership of the Australian Psychological Society. Eligibility for membership of the Australian Psychological Society is a requirement for registration to practise as a psychologist in Victoria and most other States currently are introducing Bills to register psychologists.

Previously, graduates in psychology from the Wollongong University College were covered by the accreditation of psychology courses given to the University of New South Wales by the Australian Psychological Society. The University of Wollongong psychology courses now have been accredited in their own right after detailed examination by the Society's two accreditation committees of the entry requirements; course arrangements; curriculum; methods of assessment (including a review of past examination papers); qualifications of the teaching staff; laboratories, equipment and technical facilities; library holdings and annual expenditure; computing and calculating facilities.

1974 RESEARCH REPORT PUBLISHED

The 1974 Wollongong University College Research Report has been published.

In his foreword, the Vice-Chancellor, Professor L.M. Birt, says: "This report describes the research undertaken by the staff of Wollongong University College in the last year of the existence of that College; in a sense, it provides a summary of the scholarly activities which were established and maintained during 12 years of university work conducted by the University of New South Wales at Wollongong.

"The range of topics covered in the document is a good indication of the nature and extent of the growth of university studies in that time. In contrast to the nineteen Departmental entries that follow, there were only seven in the first report (published in 1966 and covering the years 1962-1965) from the Departments of Arts and Commerce, Chemistry, Electrical Engineering, Mathematics, Mechanical Engineering, Metallurgy and Physics.

"The growth in research activity makes it clear that the staff of the new University of Wollongong will be well placed to make a significant contribution to university research."

In 1974, grants and donations for research from outside organisations totalled $93,574.
NOTES FROM THE ACADEMIC SENATE

VICE-CHANCELLOR'S BUSINESS

The Vice-Chancellor informed the Academic Senate at its August 13 meeting that "the council other than the first council" had met and had elected the Honourable Mr. Justice Robert Marsden Hope to the position of Chancellor and Mr. D.E. Parry to the position of Deputy Chancellor. He also informed Senate that Council members themselves had elected three members.

The Vice-Chancellor told members that the Budget Advisors Committee, to advise him in the framing of a "global budget" for the University, had been formally established. Its membership is: Professor A.C. Cook, Professor A. Keane, Professor M.G.A. Wilson, Mr. J. Bell, Mr. J.C. Hazel, and Mr. B.J. Meek.

The Vice-Chancellor advised Senate that he had appointed Associate Professor E.R. Phillips to the position of Acting Chairman, Department of Geology, from August 4 until Professor A.C. Cook's term of office, as chairman of the Academic Senate, expires.

The Vice-Chancellor informed Senate that in recent talks with the N.S.W. Minister for Health, Mr. Healy, the Minister had acknowledged that a medical school at the University of Wollongong was not a closed issue.

The Vice-Chancellor informed members that the University's Inaugural Professor of Education, Professor Ron King, was now on campus.

The Vice-Chancellor tabled his report to Senate on 1976 Student Load Estimates together with the Deputy Vice-Chancellor's report to the Vice-Chancellor on the same subject. It was agreed that the Registrar should contact each Departmental Chairman to obtain his reaction to the proposal that there be no restrictions on the number of enrolments in subjects offered by the University. On receipt of this information, Senate should consider seeking Council's approval for the Vice-Chancellor to authorise the restriction of enrolments in subjects if this was deemed necessary.

DIFFERING RESOLUTIONS

Senate resolved that, if its Agenda Committee provided a draft resolution which differed from the resolution of a Senate Committee, the Agenda Committee would identify the alteration by using an appropriate symbol, thus (#).

GRADUATE STUDIES COMMITTEE

Senate resolved that the Graduate Studies Committee chairman's term of office would be two years.

UNDERGRADUATE STUDIES COMMITTEE

Senate resolved that the Undergraduate Studies Committee chairman's term of office would be two years. Dr. G. Doherty was elected chairman.

GENERAL STUDIES COMMITTEE

Senate resolved that the General Studies Committee chairman's term of office would be two years. Dr. B.J. Opie was elected chairman.

COMMITTEE QUORUM

Senate resolved to request all its Committees to report on the feasibility of adopting a quorum which is the same as that applying to meetings of the Senate, i.e. two-thirds of the total membership less the number of members on approved leave of absence.

FACULTY CHAIRMEN REPRESENTATION

Senate resolved: (i) that with existing Senate Committees and Working Parties which provide for a Faculty Chairman to serve as a member of such a Committee or Work-
ing Party, provision should be made for the Faculty Chairman, if he elects not to serve on such a Committee or Working Party, to appoint a person to serve on such Committee or Working Party for his period of office as Faculty Chairman; and (ii) that advice be requested from Faculties and the Academic Assembly on the desirability of creating the office of Deputy Chairman of Faculties, to be elected by Faculty, and comment be sought on the role and function of the office.

TEACHING RESEARCH UNIT

Senate resolved: (i) that a Working Party should be established to advise it on the implementation of the proposal for an Education Methods Unit; and (ii) that the working party comprise the Chairman, Audio-Visual Policy and Equipment Committee, and the Professor of Education, subject to his concurrence.

COMMON VACATION WEEKS

Senate resolved: (i) that the circular, entitled "Common Vacation Weeks" and dated June 27, 1975, from the A.V.C.C. should be referred to all Faculties for consideration with the 1977 Academic Calendar; and (ii) that the Faculties be advised that their responses on the 1977 Academic Calendar should be submitted in time for Senate's consideration at its December meeting this year.

SOCIO ECONOMIC RESEARCH UNIT REPORT

Senate resolved: (i) that, when proposals for interdisciplinary research projects were submitted, the Chairman of one of the Departments involved in the project should be responsible for administering the project; (ii) that it be noted that the Universities Commission in its Sixth Report gave no specific support for H.E.N.R.I. or for any particular activity proposed for H.E.N.R.I.; (iii) that it be noted that the establishment of a Socio Economic Research Unit was not consistent with the recommendations of the Working Party on New Developments, unless the proposal to establish such a unit received support under the University's submission to the Universities Commission on Category B Research Funding; (iv) that it be noted that the Research Committee would, in due course, invite submissions for proposals for Category B Research Funds and that the Socio Economic Research group might wish to respond to the Research Committee's invitation.

AUDIO VISUAL POLICY AND EQUIPMENT COMMITTEE

Senate resolved: (i) that the Registrar be requested to conduct an election to fill the vacancies on the Audio Visual Policy and Equipment Committee for representatives of the Faculty of Science and Social Sciences and that the Chairmen of these Faculties be advised accordingly; and (ii) that a central audio visual facility should be established in 1976 with staff and resources to be determined when the budgetary allocations are determined; the unit to maintain its present range and type of activities.

LIBRARY

The Vice-Chancellor agreed to discuss, with the Librarian and the Library Committee chairman, the practice which the Library followed in disposal of library and archival material.

ROLE OF FACULTY AGENDA COMMITTEE

Senate resolved that: (i) the Faculties and the Academic Assembly responses to the Faculty of Science's proposal on the functions be noted; and (ii) there be no change in the terms of reference of a Faculty Agenda Committee.

STUDENT PARTICIPATION IN ACADEMIC GOVERNMENT

Student members of Senate raised the matter of expanded student membership of Faculties. A number of difficulties appeared to prevent implementation of all of the proposals of the Student Co-ordination Committee. Senate agreed to consider further proposals on student representation at a later date.

Senate resolved that there be no change in the arrangements regarding student membership of Faculties.
Senate noted that the Student Co-ordination Committee proposals below can be implemented if the Departments wish, with Senate's approval: (a) that elections for departmental representatives be held in the third week of the first session; (b) that, at the beginning of each academic year, the student representatives from the previous year will conduct meetings for the purposes of election of the new student representatives (each level, e.g. 100, 200, will hold separate meetings); (c) that the time of these meetings be announced at least one week in advance so that the majority of students can attend; (d) that representatives will be elected by a simple majority of students at the appointed meeting.

Senate resolved that the following proposal be not accepted: "that there be one student representative from each year including post-graduate. (If there are more than ten staff members, further student representatives should be elected in the ratio of one student to each 5 staff members)."

Senate resolved that: (i) the recommendation, that student representatives on the Academic Senate and the Academic Assembly be chosen only from the departmental and Faculty representatives, be not supported; and (ii) the recommendation, that student members of each department be allowed to elect one formal representative for Faculty and two alternate representatives to act in the absence of the formal representative, be not supported.

AUNTY JACK VISITS THE BOTANIC GARDENS

By Mr. Keith Tognetti, Dept. of Mathematics

The day was a very special day for Wollongong. In honour of Tree Day, Aunty Jack visited the Wollongong Botanic Gardens. By a remarkable coincidence we met Mrs. Edna Everidge leaving as we entered the gardens. Aunty Jack gave a friendly squeeze to Edna's gladioli.

"What a sensitive touch, even through the boxing glove", said Edna.

"Caught ya flogging the glads, eh Edna", chortled Aunty Jack. Edna shook her head in sorrow.

"This was the only disappointment of my visit. But they have everything else, a rose garden, scotch pines and wonder of wonder, a ROTUNDA." Her eyes moistened.

"I could hardly believe my eyes but there it is, with its pretty little Greek columns and a perfectly circular top. It fills me with sweet memories of my girlhood in Moonee Ponds before the war. This is real Progress! And not only a rose garden AND a rotunda but also a lovely, lovely Retaining Wall, built with nice, neat, smooth bricks. None of that messy-gum-trees-and-old-sleeper stuff. And just look at the beautiful vista, not at all cluttered up with trees, just lots of nicely mown meadows, exactly as it used to be when the Aborigines lived here.

"Now look at the magnificent driveways, over 4 kilometres of Persil White dazzling concrete, a symbol of Wollongong's purity and the triumph of our glorious Industry over the wilderness that once was."

Aunty Jack took in the scene.

"I've got a bloody wonderful idea. If they let everybody drive their cars into the Gardens they could make it just like a Safari Park. But instead of lions they could look at Wild Wattles."

"Yes", replied Edna with admiration, "and how interesting it will be in the mating season; I've heard some absolutely dreadful stories about the wooing of wattles."

"Mating season!" said Aunty Jack grabbing Edna and hoisting her into the side-car, "let's show the wattles a trick or two." And with that they roared off towards the Rotunda.

Looking at them flying down the track I felt that somehow this setting had been designed just for them.

And whoever the designer was, he certainly deserves a medal for bravery.
N.S.W. UNIVERSITY COUNSELLORS' CONFERENCE AT WOLLONGONG

Friday, September 12, represents another "first" for the University of Wollongong in University Year. This is the date for the first meeting of university counsellors in New South Wales to be held outside the Sydney metropolitan area.

For the past two years, counsellors working in the six New South Wales universities have been meeting once a term to discuss areas of common concern, share information on developments in counselling and develop their professional skills. In the past these meetings have been held at the metropolitan universities. However, the September meeting is being held at this University.

The major area to be considered at the meeting will be psychological difficulties of students resulting from loneliness and feelings of isolation. Experiences with this problem on the six campuses will be shared and various programmes aimed at the problem will be discussed and evaluated.

Jim McLennan of the University's Counselling Centre will be chairing the one-day conference. It is expected that counsellors from some of the Colleges of Advanced Education will also be participating.

RADIOISOTOPE COURSE FOR NON-GRADUATES

The Australian School of Nuclear Technology will be running a radioisotope course for non-graduates at Lucas Heights from February 2 to February 20, 1976.

The objective of the course is to assist personnel below graduate level to gain understanding and proficiency in radioisotope techniques to enable them to use these safely and efficiently. It will be presented by staff of the AAEC Research Establishment and the University of New South Wales.

The fee for the course, exclusive of accommodation, subsistence and fares, is $300.

The performance of assignments and other tests and during practical work, will be used to assess the students' ability. A certificate will be awarded to students who demonstrate satisfactory performance.

The number of places in the course will be limited.

Further information and application forms may be obtained from Mr. P. Wood, Student Services, ext. 363.

The closing date for applications is December 15, 1975.

VISIT BY MOBILE INQUIRY CENTRE AND BOOKSHOP

The Australian Government's Mobile Inquiry Centre and Bookshop will be located on the Union lawn from Tuesday, September 16, to Friday, September 19. It will be open each day between the hours 9 a.m. and 7 p.m.

Visitors to the Centre have the opportunity to ask questions about Australian Government activities and to buy Government publications, including official reports. If possible, inquiries will be answered on the spot. More detailed inquiries are referred by telephone or facsimile machine to the Australian Information Service's Central Reference Unit in Canberra.

In addition to Australian Government publications the Centre also carries publications from the World Health Organisation and British, Canadian and New Zealand governments.

S.R.C. NEWS

- Tertangala staff have decided to publish an alternate handbook.

- At its meeting held on July 31, the S.R.C. supported the Sandwich Factory on its food and drink prices. It also agreed to allow the Sandwich Factory to make use of S.R.C. facilities.
The Swedes have adopted a motto for Orienteering - "self chosen route in unknown terrain, clear thought during physical strain, quick decision in tough competition."

Orienteering is unique because a single course can be arranged in so many permutations and combinations with varying degrees of difficulty. In its most casual aspect you may wander through beautiful scenery with a map and compass, navigating from feature to feature, savouring the views and fresh air at your leisure. In every Orienteering event there is a course for the young and old, and hikers who wish to treat the sport as easy and interesting healthy relaxation. At the other end of the scale, those who wish to taste the excitement and the exertions of cut-throat competitive Orienteering can take part at the elite and championship level.

An attempt is being made to begin an Orienteering club in Wollongong. There will be an evening of films, explanation and assistance on Saturday, Sept. 13, at 7.30 p.m. at Smiths Hill Girls High School and an event the following day, Sept. 14, at Loftus. The event will start from the back of the tram museum; parking is available at the back of the museum or at the oval nearby. You can start anytime between 9.30 - 12 noon. A sport suitable for all standards of fitness. Olympic athletes do it, babies do it (on their parents backs). Contact Lyndal Dennis (ext. 311) or Sue Healy (ext. 287).

BASKETBALL CLUB

The University Basketball Club is starting its fund-raising for the 1977 Inter-varsity Basketball which is to be held at Wollongong.

Accordingly, a "125 club" is being promoted, and it is hoped that you will be able to help the club and the University by purchasing a ticket.

The following details will be useful to you when buying your tickets:

COST PER TICKET: 10 instalments at $2 each or $20 per ticket.

PRIZES: Weeks 1-9: Weekly Prize of $20 each.

Week 10: 22-inch Colour Television.

Winners are determined by the last 3 digits of the first prize in the first lottery drawn each week.

For further information, contact Grahame Morris in the Maths Dept., Hugh Brandon in the Administration Finance Office, or Merrie Williams at the Basketball Stadium.

(Report by Grahame Morris)

**NEWS FROM OTHER UNIVERSITIES**

**SOUTH AUSTRALIA'S FIRST COURSE FOR DIETITIANS**

South Australia's first course of training for dietitians will be introduced in the School of Medicine at Flinders University in 1976.

The Vice-Chancellor of Flinders, Professor Roger Russell, said the course would meet the increasing need for dietitians in South Australian hospitals. A maximum of twelve places will be available in the course in 1976.

The basic pre-requisite for admission to the diploma course is a bachelor's degree in the life sciences, including studies in biochemistry, organic chemistry, physiology and microbiology.

The diploma course will open up new frontiers in medical education in South Australia. At present, most dietitians who practise in South Australia receive their training in Sydney.

**NOTICE**

Professor J. Lindberg will talk on "Toward a Dynamic Typology of Manufacturing Location" at 1.30 p.m., Friday, September 5, in Room 201, Arts, Commerce, Science Building.

**ADVERTISEMENT**

**WANTED**

Casual weekend gardener, Austinmer. Contact Felicity McGregor, Library Annexe, Ext. 418.
