thanked Miss de Jersey for arranging the itinerary and preparing historical
details.

LATE HERBERT CLARK HOOVER, 31st PRESIDENT OF THE UNITED STATES:

The death at 90 years of age on October 22nd of President Hoover removed
a link with Illawarra of which perhaps not many people were aware.

Although common knowledge that Hoover spent some years in Australia
prior to and after the turn of the century, it is not so well-known that he was
a Director of The Australian Smelting Corporation Ltd., the successor (December
28, 1905) of the Smelting and Refining Co. of Australia (1901) Ltd., operator
of the old Dapto Smelters. The A.S.C. commenced the building of a plant behind
the present works of the E.R. & S. Co. Ltd. at Port Kembla but the Corporation
did not flourish and very little was done. Some years ago the partially finished
chimney of the projected works and which had done duty as an incinerator was
demolished. The Society has a slide of an A.S.C. steam locomotive with the
Corporation’s name on the tank.

Well-known as a Mining Consultant, Hoover at the early age of 22 years
was a most “ruthless and efficient” manager of the Sons of Gwalia Gold Mine
in Kalgoorlie, W.A.

The above note is based on information supplied by a former Hon. Secretary,
David Elson, presently working in England.

SOME OCTOBER ANNIVERSARIES — FROM R.A.H.S. NEWSLETTER No. 30:

1774 Norfolk Island discovered by Cook.
1811 Foundation Stone of Sydney Hospital laid by Macquarie.
