PEACE STUDIES SEMINAR ON CAMPUS

Three visiting speakers engaged the audience at a seminar on peace studies held at the University of Wollongong on August 19. Barbara Wien of the World Policy Institute, New York, described the considerable boom in peace studies courses at US universities. David Aspin, Professor of Philosophy at King’s College, London, exposed the absurd logic behind the vehement attacks on peace studies in Britain. Finally, Vanessa Letham of the Peace Education Project, Perth, told about the enthusiasm by school teachers and students for workshops in conflict resolution in Western Australia.

The seminar was organised by the Peace Studies Working Party which was set up by University Senate following a survey by the Wollongong University Nuclear Disarmament Association (WUNDA) which showed widespread support for peace studies among staff and students. The Working Party includes members from a variety of departments, and has been preparing a document outlining the form peace studies might take at this University. The seminar was the opportunity to present this document for discussion and debate and also to learn from the visiting speakers.

Barbara Wien is author of the popular Peace and World Order Curriculum Guide which gives 40 case studies of peace studies programs in the US. She told the seminar about the state of peace studies there as well as in countries from Canada to China. Although US tertiary institutions are far ahead of Australia in introducing peace studies programs—there are numerous degree-granting programs, for example—there are also difficulties. Many of the US courses are one-off efforts, and there is a lack of committed resources. These problems provide some lessons for any Australian program.

David Aspin described the ideological attack on peace studies in Britain. As a Quaker involved with the Bradford University School of Peace Studies—which is funded by the Quakers—he was astounded by some of the criticisms of peace studies by right-wingers.

Roger Scruton, a bitter opponent of peace studies, proclaims that all education must be remote from students’ interests, and that interdisciplinary ‘studies’ are inherently illegitimate. Aspin pointed out that Scruton, a philosopher, had used illogical arguments which, if applied to other areas of education, would rule them out too. Aspin argued that the study of peace and conflict was just as legitimate as the study of health and disease, which is accepted in universities.

Vanessa Letham has found that one of the usual approaches to peace studies, starting with military technologies, strategies and the consequences of war, is often not a good one for students. High school students feel powerless in the face of war, and one way to overcome this is to develop visions of peace and of how each individual can contribute towards peace in a small way as part of a wider movement. She has found that dealing with interpersonal conflicts is a good way to begin the study of peace issues. Letham also pointed out that this approach in secondary schools sometimes raises difficulties when it comes to assessing students.

The afternoon session was devoted to the draft proposal for peace studies at The University Of Wollongong. Many valuable points were raised in the discussion which included contributions from virtually all those attending, such as topics which hadn’t yet been included and the relation of peace studies to disciplinary study.

Members of the Working Party came out of the discussion reinforced in their belief that peace studies is something that is important for The University of Wollongong, and something where the University can take a leading role in Australia. They will now proceed to produce a final report and proposal for submission to Faculties and Senate.

WORD PROCESSING CLASSES FOR STUDENTS

As from tomorrow, September 3, the Computer Centre will be offering classes in basic word processing to students of the University using Sperry personal computers and the Microsoft Word word processing package.

The cost of these classes (payable upon booking) is $12 for one and a half hours in a class of six.

Any students interested in these introductory courses should contact Ms J. Lombardi at Computer Reception in the Austin Keane Building, or on ext 3850.
The Australian Vice-Chancellors' Committee appreciates the difficulties the government has faced in framing the 1986–87 Budget. While it would be short-sighted and deleterious for the future of Australia to cut drastically the expenditure on higher education, the AVCC accepts that the commitment to expand the number of places in higher education will be limited to the government's drive to increase participation. The Vice-Chancellors point out, however, that at many institutions the capacity to take in extra students will be limited by lack of capital development. It is hoped that the $250 administration fee will not inhibit the expected increase in participation.

It is sad that, in these difficult economic times, Australia's support for overseas students has had to be further curtailed by the increase in the amount and application of the Overseas Student Charge. The decision to remove the exemption for university postgraduate award holders will cause problems within individual institutions.

The government has been able to increase slightly the allocation for research. This will enable universities to build upon their considerable successes in research and development which have been achieved to date.

The Acting Chairman, Professor J.F. Schoot, said: 'The government and the Minister for Education have treated higher education fairly in the circumstances. I hope that by the time plans for the 1988–90 Triennium are announced, the economic position will be brighter and the government will be able to fund the universities at a level which will enable them to serve the community effectively and efficiently'.

**TASC RESEARCHER WINS COMMONWEALTH GOVERNMENT INDUSTRIAL DEMOCRACY RESEARCH GRANT**

Stewart Carter, Professional Officer in the University's Centre for Technology and Social Change, has been awarded a $12,535 grant by the National Labour Consultative Council (NLCC) to carry out research on industrial democracy and employee participation.

The grant was one of 11 announced last month by the minister for Employment and Industrial Relations, Ralph Willis, who is also chairman of the tri-partite NLCC sub-committee on employee participation which selected the projects for funding.

Casual employment is to be the focus of the research, and particularly the problems this type of employment, which is increasingly widespread in Australia, may pose for traditional industrial democracy and employee participation schemes.

The research aims to make practical recommendations directed at specific difficulties experienced by casual employees, particularly in the retail sector. Casual employees will be surveyed and interviewed. The research is expected to show how the concept of industrial democracy can be applied to part-time employees.

Mr Carter said that the problems of casual employment in an industrial democracy context had been highlighted in previous research on industrial relations in the retail industry that he had carried out last year for both the Victorian and Commonwealth governments.

As many as 70 per cent of the members of the major retail industry union are casually employed, he said, a phenomenon whose significance is only really appreciated when it is realised that, in terms of numbers of members, the union—the Shop Distributive and Allied Employees Association (SDAEA)—is the largest in Australia.

The new study has the backing of the SDAEA, and is expected to be completed by July next year, when it should be published as background to the Commonwealth governments soon to be released 'green' or 'policy discussion' paper on industrial democracy.

Inquiries: Stewart Carter ext 3956.

**THE BULLETIN READS CAMPUS NEWS**

Remember our article in Campus News a few weeks ago telling of Jennie Chaplin's need for ponds? The Bulletin saw it, contacted Jennie and in the issue for August 26 produced this literary morceau:

'Good news for the ostracod. What surely must be the last creature on earth to have its reproductive antics pried, poked and peered at can stop hanging its head in shame. The privacy of its boudoir has been invaded. It would be unfair to dub Jennie Chaplin a voyeur but the 24 year-old does admit a more than casual interest in the ostracod's love life. She claims in her defence that she has become its only true friend. "They're just incredibly common (a numerical rather than social comment) but they've been totally ignored," she says. "They've probably got some sort of complex. These days I preach that salvation of ostracods". That no doubt is common gossip on the muddy bottoms of freshwater ponds where the tiny crustaceans live out their dull lives. For those who have forgotten what the last one they met looked like, Jennie says a fair description would be a miniature, even microscopic, mussel. Jennie's dad asked her once why she had taken the ostracods. 'What surely must be the last creature on earth to have its reproductive antics pried, poked and peered at can stop hanging its head in shame. The privacy of its boudoir has been invaded. It would be unfair to dub Jennie Chaplin a voyeur but the 24 year-old does admit a more than casual interest in the ostracod's love life. She claims in her defence that she has become its only true friend. "They're just incredibly common (a numerical rather than social comment) but they've been totally ignored," she says. "They've probably got some sort of complex. These days I preach that salvation of ostracods". That no doubt is common gossip on the muddy bottoms of freshwater ponds where the tiny crustaceans live out their dull lives. For those who have forgotten what the last one they met looked like, Jennie says a fair description would be a miniature, even microscopic, mussel. Jennie's dad asked her once why she had taken the ostracods and their problems to heart. At first it was just for a thesis to persuade the Wollongong University biology department to make her a PhD. But what feeling person could not be concerned by what trauma impels some female ostracods to give up their boyfriends in favour of asexual cloning?'

**AUSTRALIAN RURAL RESEARCH**

The Department of Primary Industry is updating its database on 'Australian Rural Research in Progress' (this was previously known as the 'Compendium of Rural Research and Development').

'Australian Rural Research in Progress' is a communication tool for the research community whereby information...
on rural research being carried out in Australia, by whom and where, is readily available along with contact numbers and some details on methodology/status. The projects are indexed and classified according to the ACDEX classification system. This information is aimed at assisting communication between researchers and reducing the possibility of research duplication. The database is to be further developed in coverage, and comment from users on additional functions or any other aspect of its utility are welcomed.

New projects are added and continuing projects updated annually. ARRIP is readily available through AUSTRALIS at a moderate charge and can be accessed by libraries and others, using standard computing equipment.

Researchers undertaking relevant work who would like it included on the database are asked to contact Ian Strahan on ext 3079 or Tom Moore on ext 3386.

REGISTRATION WITH IDP

The International Development Program of Australian Universities and Colleges is establishing registers of information in a number of areas. The registers are to help IDP in responding to the many requests for assistance received from overseas institutions and national and multilateral agencies. One of these registers is to be related to individuals in Universities and Colleges with special interest, experience and expertise in fields relevant to overseas projects.

A questionnaire for this purpose has been prepared by IDP. Copies are available from Tom Moore, ext 3386 or myself ext 3943.

P.G. Wood
Assistant Secretary, Academic Services

VISIT OF RODNEY HALL

Rodney Hall, leading Australian poet and novelist, will be Writer-in-Residence at The University of Wollongong from September 1 to October 31.

Rodney Hall has published three novels, Just Relations, the most recent, won the Miles Franklin Award for Literature in 1982.

He has published six books of poetry, and has edited several anthologies, including the Collins Book of Australian Poetry.

While at The University of Wollongong he will give lectures and readings from his work, and be available for discussions with students, writers, and members of staff.

SOME DATES TO NOTE

Monday September 8, 9.30–11 am, Music Centre, University of Wollongong.

Lecture: Contemporary Australian Literature.

Poetry Workshops: Wednesday, September 10, 9.30 to 11.30 am, Thursday, October 9, 1.30 to 3.30 pm.

Both to be held in the Writing Room at Glennifier Brae

SCARP Launch, October 7 Wollongong City Art Gallery, 7.30 pm.

Poetry Reading, Northern Lounge, University Union, 12.30 to 1.30 pm, Tuesday October 28.

Dinner followed by a reading. Date and venue to be finalised.

For further details: Ron Pretty 270867 (3867) or leave a message on 270985 (3985).

QUOTA INTERNATIONAL INC.
BICENTENNIAL COMMUNITY SERVICE AWARD FOR YOUNG WOMEN

As part of the Australian bicentennial celebrations, Quota in Australia want to give recognition to young women in the community who give their time voluntarily in community service.

Quota have now established the Quota International Bicentennial Community Service Award. The award will recognise service given by the entrant on a local, state or national level. The Quota Clubs of Wollongong and Port Kembla have combined to promote the Award in the Illawarra.

The Award is being conducted Australia wide through Quota, the International service organisation that has long supported young people through scholarships, school emergency funds, support for school libraries, student of the year awards, riding for the disabled, youth shelters and refuges, assistance for the unemployed, youth camps, and areas of specific need, including handicapped children and those with hearing and speech impediments.

The Award is open to young women between 18 and 25 years of age, who are involved in any area of community service — service to elderly, underprivileged, or youth and sporting activities, drama groups, music, guiding and scouting — any voluntary community involvement. Every entrant will receive a certificate of appreciation for her work.

The national launch was held in Geelong, Victoria, on July 6. To begin the selection of an Illawarra entrant for the national award, a civic launch was given by the Lord Mayor Frank Arkell, on August 12.

The Illawarra entrant will be chosen from entries received up to March 1987. The winner of the Illawarra judging will go to the Quota Clubs 35th District judging in August 1987 and the District winner will enter the National judging in March 1988. The National winner will be honoured at the International Convention of Quota, to be held in Melbourne in July 1988.

Prospective entrants can obtain entry forms from the Friends of the University, 49 Northfields Ave, (opposite the Union) phone (042) 270073.

ACADEMIC STAFF EMPLOYED UNDER ADVANCED EDUCATION CONDITIONS

Applications for Promotion or Progression close with Mr Ross Walker, from whom additional information is available, on September 22.

Books Received

FIFTY YEARS AGO

Luigi Strano, Honorary Master of Arts graduate of the University of Wollongong and President of the newly formed Italian Writers Association of NSW, has recently published his 11th volume of poetry. The volume gathers together some of Strano's most significant poems produced over a 50 year period written directly in English (though some are translated from the Italian) and has been compiled for people interested in his poetry but who are not able to read Italian.

Strano's English poems, many of which have been published in his previous volumes, come across as sparse and incisive but always characterised by the innate philosophical wisdom of the southern Italian cultural tradition which is to be found in his poetry written in Italian or in his native dialect of Calabria.

They are product of his thoughts and observations on a half century of life in Australia as evidenced, for example, by the brief but thought provoking poem Australian Alien: "It all depends/on what happened yesterday;/it all depends /on what the papers say,/whether today/you are a wog/a new Australian/or an alien."

The volume contains an introduction by John Taylor which stresses, among other things, Strano's not uncommon polyglot talents. English is in fact Strano's fourth language and yet he writes excellent poetry, surely an eloquent tribute to an immigrant who came to this country at the age of 16 becoming over the years "a scholar and a poet."
QUESTION TIME: GENERAL STAFF CONDITIONS OF EMPLOYMENT

Question

I am employed in a general staff position on a permanent part-time basis. Am I entitled to maternity leave?

Answer

Yes, the New South Wales Universities (General Staff Conditions of Employment) (State) Award at Clause 21 prescribes general staff's entitlement to maternity leave. The Award does not provide an entitlement to paid Maternity Leave for part-time employees although it does an entitlement to maternity leave in accordance with the New South Wales Industrial Arbitration Act.

Under that Act a part-time employee is entitled to 52 weeks maternity leave without pay, subject to having completed 12 months continuous service immediately prior to the absence. The period of maternity leave must commence not later than four weeks before the expected date of birth, and include a period of at least six weeks immediately following the actual date of birth.

Part-time staff intending to proceed on maternity leave should contact the Personnel Services Branch to find out the requirements for notification of absences on maternity leave.

Further details: Peter Maywald, ext 3798.

ADVERTISING OF GENERAL STAFF VACANCIES

Two significant developments in the advertising of general staff vacancies should be noted:

First, all general staff vacancies will now be advertised internally and externally at the same time. This is as a result of the University Council approving in August a policy of concurrent external and internal advertising of vacancies. General staff vacancies schedules will continue to be distributed to all departments and sections of the University. Secondly, external advertising will take place not more than once a fortnight with all vacant positions advertised as part of a composite advertisement. In order to provide sufficient lead-in time, finalised and approved advertisements must be in the Personnel Services Branch not later than Thursday week before placement on a Saturday.

Further details: Gary Graham, ext 3935.

CURRENT VACANCIES

* Extension Officer, Centre for Continuing Professional Education, closing date September 9
* General Library Assistants, (2 positions), Michael Birt Library, closing date September 9
* Telephonist, Business Services, closing date September 9
* Word Processor Operator, Mathematics, closing date September 9
* Gardener, Buildings & Grounds, closing date September 9

New Starters
Ms J.A. Barnes, Administrative Assistant, Library
Ms S. Rose, Technical Officer, Centre for Teaching Development
Mrs S.M. Gallaher, Clerk, Finance Office
Mrs A. Flaso, Cleaner, Buildings & Grounds
Mrs C. Hrelja, Cleaner, Buildings & Grounds
Mr S. Misra, Research Assistant, Metallurgy & Materials Engineering
Mr R.A. Anderson, Lecturer, Health Sciences

WORKSHOPS IN SELECTION TECHNIQUES – WHO NEEDS TRAINING?

"Who me? I don't need to learn about selection techniques, I've been doing it for years!"

Unfortunately, as we all know, frequency of activity doesn't always equate with accuracy or excellence. It's true, some people have been on many selection committees and some are gifted selectors. At the interview, they know how to put applicants sufficiently at ease to extract the maximum information about their skills and abilities relevant to the requirements of the job under review.

They prepare carefully, scrutinise the job description, design their questions using a combination of questioning styles, determine criteria against which each applicant will be measured comparatively and work out systems of ranking techniques. I've been doing it for years!

But it is a rigorous and exhaustive process which requires a commitment in time and effort, and a great deal of skill, knowledge and integrity.

On top of this, "rules" have changed over recent years about what are allowable considerations. Some people still think it's OK to "rattle" interviewees to see what they're "made of"; despite evidence that performance under stress at an interview has little relevance to job performance, even in stressful jobs.

Others delight in gimmicky questions, inviting textbook answers which, they think, show how "bright" applicants are. A few persist in personal questions which have no relevance to the requirements of the job. Eg: "Have you made of" despite evidence that performance under stress at an interview has little relevance to job performance, even in stressful jobs.

The agenda for the next meeting indicates the range of activities that are undertaken by the Graduates Group, which will be at:

6 pm Wednesday September 17 in the Union Board Room
Any graduate, whether a paid up member of The Graduates Group or not, is welcome at these meetings—although only members can exercise voting rights.

The first of these courses was conducted in August and many more will be available over the next months to ensure availability for all eligible staff.

Those who attended the first course, including staff experienced on selection committees, agreed that there was a great deal learned or refreshed. If you wish to attend one of these courses, please contact Wendy Raikes on ext. 3798, or watch for further details in Campus News.

Kathy Rozmeta
Ext: 3917
APPLICATION FOR TRAVEL GRANTS

The A.W. Howard Memorial Trust Inc. was established in 1964 by the Australian Institute of Agricultural Science to perpetuate the memory of Amos Howard who fostered the use of subterranean clover as a pasture plant in Australia.

The objects of the Trust are to ‘encourage and promote research and investigation in the fields of natural science and social science, including economics which relate to the development, management and use of pastures.’

The Trust now invites applications for travel grants to assist in attending overseas conferences related to the objects of the Trust and to be held between 1 December 1986 and the end of 1987. Grants in the past have averaged $1500 and are intended as financial support towards attending conferences and related travel.

Closing date September 19.

KEMPSEY SHIRE ART PRIZE

Kempsey Shire art prize incorporating the Macleay Valley heritage award, September 26 to October 6. Civic Centre, West Kempsey. Prize money $3500.

1987 TRAVELLING SCHOLARSHIPS

Entries are now being accepted for a two-year travelling scholarship, valued at $5000 per annum, in each of the fields of:

1. Poetry
2. Prose
3. Acting

The Scholarships are intended to augment the scholar's own resources for study, maintenance and travel in Australia or overseas.

Closing date October 31.

RESEARCH STUDY GRANT 1987-88

The Australian Institute of Management – Queensland division and Telecom Australia invite applications for a grant of $10,000 to conduct research and prepare a learned paper on the subject of Management of Changing Cultures in Australian Organisations.

Closing date September 26.

JEAN DENTON MEMORIAL SCHOLARSHIP

This Scholarship Fund was established by the Kindergarten Union of South Australia in 1977 and is now administered by the Scholarship Committee, the Public Trustee and the legal successor to the Kindergarten Union, the Children's Services Office.

Applications are invited for the Jean Denton Memorial Scholarship.

The Scholarship is available to any person in Australia working in Early Childhood Education or a related field.

The Scholarship is for advanced or post-graduate studies or research either within or outside Australia with the purpose of benefit of such studies and/or research being applied in the pre-school area within Australia. The Scholarship is granted for a one-year period, and is not intended to provide financial assistance for routine study leave.

Closing date September 15.

DOMINIQUE SEGAN CASTLEMAINE STATE FESTIVAL DRAWING PRIZE

November 1986, 1st prize $2,000, 2nd prize $500.

VISUAL ARTS BOARD

Kiffy Rubbo Memorial Fellowship—one grant of $19,250 towards travel and living expenses for a specific project in the contemporary field undertaken by an artist, art administrator or curator.

Closing date October 15.

GRANTS FOR COLLABORATIVE R & D IN INFORMATION TECHNOLOGY

As part of its program in information technology, CSIRO provides grants to support collaborative research and development work in this field between CSIRO Divisions and partners in Australian industry, universities and other tertiary educational institutions. The areas of expert systems and image analysis will receive special emphasis in 1987.

Projects should in general involve approximately equivalent contributions, in terms of staff effort, equipment or supporting finance, from CSIRO and the partner organisation and could be carried out in a CSIRO laboratory or largely within an industrial or university laboratory. The criteria used in assessing proposals include the level of scientific or technical innovation in the proposed project, the likelihood that some result or product of practical commercial interest will be produced, and the extent of collaboration with relevant CSIRO Divisions.

Closing date October 3.
COMMUNITY FUNDING FOR CHILD SEXUAL ASSAULT SERVICES

The NSW Government has initiated a program for the prevention of child sexual abuse in NSW. This will include a special community based Child Sexual Assault Services Program, which will provide a range of supportive services to assist victims of child sexual assault and, where appropriate, their families.

Support services within the scope of the non-government Child Sexual Assault Services Program include the following in order of priority:

1. The provisions of counselling and advocacy services for victims of Child Sexual Assault living at home or in alternate care, and, where appropriate, their families, including individual, group, marital, or family counselling.
2. The establishment of mutual support groups and networks for abused children and their families.
3. The provision of information and outreach services to disadvantaged groups in the community (such as disabled people, Aboriginal people, and people from a non-English speaking background).

Funds will be allocated on a needs basis. Projects attached to existing services will receive priority.

To assist in initial planning, the Department of Youth and Community Services is seeking Expressions of Interest from community groups who wish to provide services within the scope of the program.

NSW STATE CANCER COUNCIL AWARDS FOR PATIENT CARE RESEARCH

The Council is expanding its role with the objective of promoting the general wellbeing of cancer patients and their families, including research in the area of patient care.

To stimulate research into patient care the New South Wales State Cancer Council has set aside funds to award two major grants in 1987. The grants will be for up to two years at a maximum of $25,000 per annum, and non-renewable.

Closing date September 30.

RESEARCH PORTFOLIO: EXPRESSION OF INTEREST

The Unit is currently pursuing a diverse research portfolio which includes the following major projects:

(a) The co-ordination of forensic science in Australia.
(b) Electronic and acoustic warning signals for emergency vehicles.
(c) The compilation of a National Forensic Resource Register.
(d) Audio and audio visual recording of police interviews.
(e) High speed pursuit devices and associated procedures for use by law enforcement authorities.
(f) Tape recording enhancement and authentication.
(g) Community Policing initiatives and evaluation.
(h) Occupational stress—with particular emphasis on coping with horror.
(i) Psychology screening—with particular emphasis on screening for specialist police duty.

Work on the major projects is undertaken in close co-operation with tertiary institutions.

REGISTER OF AUSTRALIAN ENERGY, RESEARCH, DEVELOPMENT AND DEMONSTRATION PROJECTS

The Information Resources Unit of the CSIRO is currently conducting an update of their register of Energy R&D & D projects. This exercise will result in the publication early next year of the 8th Edition of the Compendium of Australian Energy R&D & D Projects.

Copies of a computer printout of all relevant project records have been sent to the Departments concerned for updating.

Any members of staff wishing to have projects included on the Register are asked to contact the Office for Research and Postgraduate Studies. Entries will close on September 15.

OILSEEDS RESEARCH COUNCIL

The University has received a copy of the Oilseeds Research Council (ORC) Interim Research and Development (R&D) Plan. The Rural Industries Research Act 1985 which governs the operation of Research Councils requires the ORC to produce a R&D plan for Ministerial approval. The Act provides for R&D expenditure to all sectors of the industry including production, processing, storage, transport, marketing and servicing.

The Act requires ORC to consult with and pay due regard to all sectors of industry when developing and reviewing its five year plan. It was not possible for Council to consult with all sectors of the industry because of the limited time available to produce the interim plan. Council will however, review the plan during September and this will provide and opportunity for industry to fully appraise and comment.

Staff are invited to take advantage of the opportunity to participate in the review of the plan and to comment on the way they believe ORC funds should be allocated in the future, or on any other matter which is relevant to Council’s normal functions. A copy of the Plan is available from Mr Tom Moore ext 3386.

HOLIDAY ACCOMMODATION

Holiday accommodation is available to staff at other colleges, universities and government departments.

The scheme is intended to benefit both parties, in that staff are able to utilise good holiday accommodation at a very modest cost, while the College derives income from an otherwise unutilised asset.

This year student residences will again be available. See notice boards, other information at Campus News.
Seminars

AL EVENING

Seminar will be preceded by a char grill dinner at 6.30 pm in the Union Bistro. Those interested in attending the dinner should contact Dr E.J. Steele before the designated evening so that appropriate bookings can be made.

Seminar will begin at 8 pm in Lecture Theatre, G.19, Building 35.

Date: September ‘0
Speaker: Dr J.A. Sved, School of Biological Sciences, University of Sydney.
Topic: Hybrid Dysgenesis in Drosophila.

DEPARTMENT OF PHYSICS

To be held in the Physics Lecture Theatre Bldg, 18.Rm,118.

Date: Thursday September 4
Speaker: Dr William Zealey, Department of Physics, University of Wollongong.
Topic: Astronomical Images.

POSTGRADUATE SEMINAR IN HISTORY

September 4 — Shirley Wakeman — Methodology of the Relationship between the Australian Labor Party, the Australian Workers’ Union and the Trades and Labor Council in New South Wales, 1917-1932

September 11 — Dr Gonzalo Zaragoza, Embassy of Spain — Christopher Columbus Revisited Debates and Present Research

September 18 — Winifred Ward — Methodological Problems of the Theological Response in Australia to the Secular Society

DEPARTMENT OF BIOLOGY

Seminars to be held 4–5 pm, Ground Floor Lecture Theatre, Building 36, Science II.

Date: Tuesday September 2
Speaker: Professor Bill Lovegrove, Department of Psychology
Topic: Correlates of single cell properties in human vision: dyslexia as a case study.

Date: Tuesday September 9
Speaker: Professor A. Duncan Brown, Department of Biology
Topic: Dunaliella, intracellular glycerol and NMR. A Cautionary Tale.

DEPARTMENT OF CHEMISTRY

Seminar at 10.30 am in Room 18,206.

Date: Friday September 5
Speaker: Professor Ian Dance, University of NSW
Topic: ‘Binding Polymetallic Molecules with Thiolate and Sulfide Connectors’.

DEPARTMENT OF CHEMISTRY

Date: Friday September 5, 10.30 – 11.30 am, room 18,206
