FULBRIGHT AWARD TO ECOLOGIST

Dr Rob Whelan, Senior Lecturer in Biology, is one of eight Australians selected for Fulbright Senior Awards for 1988. The names of the award recipients were announced in the magazine of the Australian-American Educational Foundation, The Fulbrighter, in April.

This award will permit Dr Whelan to spend a six-month study leave in the United States in the first half of 1989. The basis for Dr Whelan’s award was a research proposal centred on collaboration with colleagues at the University of Florida and at San Diego State University in two areas of research: pollination ecology and fire ecology.

Professor Peter Feinsinger will host Dr Whelan’s visit to the Zoology Department at the University of Florida. Professor Feinsinger’s research team has been engaged in studies of pollination of Costa Rican cloud forest plants which parallel the research interests of the ecology/ecological genetics group, headed by Dr Whelan and Dr Ayre, at The University of Wollongong. Both groups are examining questions central to pollination ecology, such as: ‘Do plant species compete for the services of pollinators?’ and ‘What are the genetic consequences of different mating systems in animal-pollinated plant species?’

While in Florida, Dr Whelan also plans to continue a long-term research project, with the support of the State of Florida Department of Natural Resources, examining the effects of management burning in different seasons and at different frequencies on the regeneration of native tree species. This same topic concerns land management authorities in many fire-prone parts of the world, including the Illawarra region.

Fire ecology will also be the focus of Dr Whelan’s collaboration with Professor Paul Zedler, at San Diego State University. Many studies have attempted to infer the role of bushfires in the evolution of certain plant characteristics. This is certainly difficult, but an important approach is the comparison of plants’ responses to fires in regions with very different floras. Professor Zedler is an expert on the responses of plants to bushfires in the chaparral of southern California, and he has recently visited Western Australia and the Illawarra. Dr Whelan will be able to contribute his knowledge of the effects of bushfires on plants in eastern and western Australia and in Florida.

Although fire ecology is the reason for the stay in California, Dr Whelan will take the opportunity of being in the western USA to make a return visit to Dr Nick Waser and Dr Mary Price at the University of California, Riverside. These two ecologists have spent the past month and a half, as University of Wollongong Visiting Fellows, studying the pollination ecology and ecological genetics of banksias with the Wollongong research group.

Wollongong University gift ties and scarves

Wollongong University ties and scarves are available from the Union Shop. They are excellent as presents to those travelling overseas, or as gifts to colleagues, friends, and graduands.
University Attracts Second Rainforest Research Grant

The Department of Geography at The University of Wollongong has recently been awarded a $10,000 grant, under the National Estate Grants Program of the Commonwealth Department of Arts, Sport, the Environment, Tourism and Territories, to enable a detailed study of the conservation needs of the rainforests of the Illawarra region.

The study will be carried out by Dr Kevin Mills, a Research Associate in the Department. Dr Mills has been researching the flora and fauna of the region for many years and has a special interest in rainforests. He recently completed a report to the New South Wales National Parks and Wildlife Service on rare rainforest plants in the Illawarra Region.

Dr Mills said that the aim of the study is to develop a rainforest conservation strategy which will provide conservation and management guidelines for the region's rainforests. The objective of this study is an important one. My previous research indicates that approximately 75 per cent of the Illawarra's rainforests were destroyed during the clearing of the vegetation associated with settlement of the area by Europeans.

"For this and other reasons we must ensure that our remaining rainforests are managed appropriately. Special attention must now be directed towards describing the forests, identifying features and sites of conservation importance and making recommendations for their long-term conservation. It is only when we understand the ecology of the rainforests that they can be managed in an effective way. We now have a good deal of information on the way in which these rainforests work and can thus begin to formulate management guidelines."

The study will begin almost immediately and will be carried out over a period of approximately 18 months.
WOMEN IN ENGINEERING BURSARIES AWARDED

For the first time in the history of the Faculty of Engineering, three bursaries valued at $500 each were awarded at a Women in Engineering Information Evening held on May 24.

Female pupils from Years 9 to 12, their parents and School Careers Advisors from the South Sydney, Liverpool, Campbelltown, Illawarra and South Coast areas, were invited to learn about career opportunities in engineering.

The program included information about courses available, talks by women working and studying in the engineering field as well as a question and answer session.

In order to encourage more women into engineering, each of the four departments within the faculty offers a bursary worth $500 to the female student enrolling in the first-year full-time (48 credit point) program of the course, who has completed the HSC within the previous two years and has obtained the highest HSC mark of those eligible in the department.

The bursaries were presented to Snezana Dragisic (Electrical and Computer Engineering), Shiva Ghahreman (Civil and Mining Engineering) and Elizabeth Sharp (Metallurgy and Materials Engineering).

PUBLIC LECTURE -- CHARLES J. DILLMAN

As a part of the Expo '88 program a public lecture will be held on June 16 beginning at 7.30 pm. Organised by Dr Peter Milburn in the School of Health Sciences, the lecture is entitled 'Sports Science and the US Olympic Program.'

The speaker will be Charles J. Dillman, who has a PhD from the Pennsylvania State University and has held academic appointments at the universities of Illinois and Delemore and has been Director of Sports Medicine for the United States Ski Team and is presently Director of Sports Science for the US Olympic Committee. He has published widely in scientific and sports journals. He is also the recipient of numerous US awards.

Further information from Dr Peter Milburn, ext 3496 or 3881.

ACCOMMODATION IN CANBERRA

Wollongong University staff on visits to Canberra are invited to make use of the accommodation available at University House, at the Australian National University. Staff are invited to make the ANU their home, whether their stay is overnight or for several weeks. They are not only eligible but very welcome to stay whenever they are in Canberra. A brochure and current tariff schedules are with the Secretary, Planning and Marketing.

Staff are particularly invited to join members and residents at House Dinner at 6 pm on Wednesday evenings in hall. No booking is necessary and the charge of $15 per head includes wine.

For those visiting Canberra on either a short or long assignment this is an excellent way to meet people outside their specific fields.
HISTORY OF WOMEN AND EDUCATION

The Gender and Education Unit, School of Learning Studies, and the Australian and New Zealand History of Education Society (NSW Regional) are jointly sponsoring Studies, and the Australian and New Zealand History of The Gender and Education Unit, School of Learning Wollongong, PO Box 1144, Wollongong, 2500.

ITALIANS ARE NEVER LOST FOR WORDS

In this Bicentennial celebration year, printing presses are running hot, churning out countless publications on the ways in which multiculturalism has shaped our Australian way of life. Among them are works on the Italian influence. However, there will be few, if any at all, which will explore the converse influences that the English language itself has had on Italy’s since before it became a united country, with its own national language; one which transmigrated here in the process of cultural modification.

Although several attempts have been made in the past to investigate the phenomenon of inter-linguistic borrowings by Italian speakers from the English idiom, these have been far less exploratory and considerably less comprehensive than Gaetano Rando’s Dizionario Degli Anglicismi Nell’Italiano Postunitario.

Its introductory pages examine the nature of the marriage between selective parts of idiomatic English, past and present, which has evolved into the current every-day vocabulary of Italian speakers at home and abroad. As language, it should be borne in mind that modern Italian is a relatively new arrival, since it was born out of a highly competitive flux of multi-regional dialects which were only gradually subordinated to a national language itself has had on the Italian language of today, which merely wish to improve, the dictionary offers an uncomplicated source for hours of entertainment. For example, ‘exchange’ (money), ‘cameras’, ‘slides’ and ‘tourist agency’ are commonplace for on-the-spot advertising.

Through the influence of the international world of commerce, the Italians have, for further citation, adopted Automazione (automation); industrial design, marketing, supermarket, public relations, Slogan Publicitario (advertising blurb) and manager. There are many more examples.

This dictionary cites some 2,300 words of this nature, all of them succinctly explained and annotated to give sources and dates of origin.

In Italy, this dictionary has already been acclaimed as a major support in studying the Italian language of today, either for scholastic reasons or for purely practical purposes. It will become a standard work of reference for students in the very near future.

For those who have a basic knowledge of Italian, which they merely wish to improve, the dictionary offers an uncomplicated source for hours of entertainment.

An interesting facet for the community of Wollongong is that the publication of this book was made possible by a grant from The Friends of the University of Wollongong Ltd, which fosters a policy of promoting local talent on every possible occasion.

LOGOS OR ICONS, PLEASE

There has been an encouraging response from Campus News readers and contributors to the changes to the appearance of the journal during the past year and more. In a move to improve the appearance further, departments whose news items appear frequently in our pages are invited to let us have logos or other identifying icons for reproduction with their contributions. Bromides or top-quality art proofs are required. Discuss problems with George Wilson on 3926 or 286691.

evident in the areas of international television broadcasting.

Several fundamental sources of this linguistic marriage of convenience are focused upon in this concise dictionary. For instance, from the world of sport and entertainment we find examples in football, tennis, poker, bowling and indoor, all of which have been adopted unchanged and freely used in modern Italian language.

From modern science and technology we find words (or adaptations) like Telefono (telephone), Telecamera (television camera), Scooter (motor-scooter) and Scooterista (motor scooter rider); computer and countdown. It can be appreciated why words like ‘computer’ have been borrowed when its Italian counterpart would be: Macchina elettrica a programmazione predisposto per l’elaborazione di dati o di informazioni.

Tourism, of course, has been another major source for such neologisms now incorporated in retail trading signs. For example ‘exchange’ (money), ‘cameras’, ‘slides’ and ‘tourist agency’ are commonplace for on-the-spot advertising.

A package of courses has been established to provide for present and future computer literacy needs of the student body. The program will be offered by ITC Computer Training in conjunction with University Computer Services. The courses will be held on Fridays.

Contact Computer Services or ITC Computer Training to book your place on a course. Tel (042) 270850 (ext 3850) or (042) 268884 (ext 3777). For details of course outlines see Campus News for May 31.

COMPUTER LITERACY PROGRAM

Did you know that the University has a computer literacy policy or that computer literacy will be a prerequisite for graduation?

Computer literacy requirements comprise keyboard, word processing and on-line library skills.

Don’t worry about it. The requirements may be met in any of the following ways:

a) Successful completion of an appropriate Higher School Certificate subject (eg. HSC Computing Science)
b) Successful completion of relevant credit-earning computer courses considered to cover the literacy skills required by the University
c) Successful completion of one of the special courses described below.

A package of courses has been established to provide for present and future computer literacy needs of the student body. The program will be offered by ITC Computer Training in conjunction with University Computer Services. The courses will be held on Fridays.

Contact Computer Services or ITC Computer Training to book your place on a course. Tel (042) 270850 (ext 3850) or (042) 268884 (ext 3777). For details of course outlines see Campus News for May 31.
Research Funds

The sources of research funds given below are available to members of academic staff. Further information including application forms may be obtained from Kim Harriss (ext 3201). Intending applicants are reminded that all research applications must be forwarded through the Office of Research and Post-graduate Studies.

MANAGEMENT RESEARCH

The National Council of the Australian Institute of Management is proposing to commission a major research study which will examine:
- The Manager's Role in Planning Future Directions for a Workforce in Partnership — Sharing
- Response and Rewards within the Enterprise.
Expressions of interest are sought.
Applications close with the University on July 4.

DIABETES RESEARCH AND EDUCATION GRANTS

Apex and Diabetes Australia invite applications for grants for diabetes research in basic, clinical and applied (educational, sociological and psychological) areas.
Applications close with the University on July 15.

PREVIOUSLY REPORTED IN CAMPUS NEWS

Australian Telecommunications and Electronics Research Board $6000
Bradlow, H.S. — Integration of Conversational Voice Communications Into Local and Wide Area Computer Networks.
Building Workers' Industrial Union $68,862 Fellowship
NSW Department of Education $6000
NSW Department of Education $35,000 Fellowship
National Estate Program 1987/88 $10,000
Australian Telecommunications and Electronics Research Board $8000 Fellowship
Ng, T.S. — Performance Analysis of Multiple Beam and Optimum Combining Space Diversity Arrays in Digital Mobile Base Stations.
Australian Telecommunications and Electronics Research Board $2000 Fellowship
Paolini, F.J. — A Pipeline Two Dimensional Fourier Transform Processor.

Research grants approved between April 21 and May 20

**Friends of the University**

WANTED BOOKS WANTED

Needed now by the Graduates' Group of the Friends for their bookstall on University Open Day, August 28. Please deliver donations of novels, texts, comics and old publications to Friends' House, 55 Northfields Avenue, Keiraville. Your old stuff can be somebody else's treasure!

For inquiries telephone 612714 (Dapto), 291951 (Wollongong), 672229 (Austinmer).

Book conveners: Johanna de Jonge 672229, Marjory Macdonald 291951.

**Concerts, Exhibitions and Entertainment**

EXPLOSIVE PRODUCTION OF LOOK BACK IN ANGER

Wollongong Workshop Theatre has begun an explosive production of 'Look Back in Anger', by John Osborne.
This gutsy play is on now at Workshop Theatre, Gipps Street, Gwynneville. Evening performances on Wednesdays, Fridays and Saturdays. Final performance will be on Saturday July 11.
For bookings ring Wilson's Record Bar 296169. Tickets $6 with concession $4.
The production is being staged in co-operation with the School of Creative Arts, The University of Wollongong.
SUPERANNUATION NEWS

A representative from the State Authorities Superannuation Board will be visiting The University of Wollongong on June 22 and 23 to talk to interested staff members regarding the State Superannuation Fund (SSF) and the State Authorities Superannuation Fund (SASS). The talks will be held in Room 303 in the Administration Building at the following times:

June 22
10 to 11 am — State Authorities Superannuation Scheme
11 am to noon — State Superannuation Scheme

June 23
10 to 11 am — State Authorities Superannuation Scheme

The representative will be available for interviews with staff members currently in the State Superannuation Scheme from 11 am until noon on June 23.

Those interested in attending any of these sessions should contact Barbara Smith on ext 3930 before June 17.

New general staff who have joined the University since April 1 this year are encouraged to attend one of the talks on State Authorities Superannuation Scheme.

COMING STAFF DEVELOPMENT ACTIVITIES

The following activities are scheduled in the near future. Staff interested in undertaking any of the programs should complete the blue nomination form, available from Personnel Services, and return by the date given below. Staff must have their Head of Department’s recommendation on the nomination form.

Do Finances Baffle You? A Seminar on The University’s Financial System — This seminar looks at the University’s financial system and how it works. It especially considers what staff need to know as users of the finance system (e.g., monthly reports, purchasing items, arranging payments, etc). Target Audience — All staff involved with University funds. Duration — 1/2 day. When -- July 28. RSVP — June 27.

Effective Communication Skills Training — This workshop will emphasise the skills of developing self-awareness and self-confidence, decision-making, and communication. Skills such as listening, constructing assertive and clear messages, obtaining feedback, saying no where appropriate, and handling aggression in ways based on self respect and respect for others will be developed. Target Audience — All staff. Duration — four half days. When -- August 3, 10, 17, 24. RSVP — July 4.

Further details: Wendy Raikes, ext 3946.

CURRENT VACANCIES

The closing date for applications is indicated in italics.

Research Assistant, Chemistry, contract appointment, June 10.
Research Fellow, History, contract 2 years, June 17.
Further details: Ross Walker, ext 3934.

STAFF CHANGES

New Starters
Mrs S.A. Nightingale, Lecturer, Metallurgy and Material Engineering.
Ms I. Burgess, Administrative Assistant, Personnel Services.
Mr S. Selby, Fitter/Welder, Uniaidvice.
Ms Y. McLeod, Typist/Office Assistant, International House.
Ms J. Oyston, Typist/Office Assistant, International House.
Mr E. Saglica, Gardener Labourer, Buildings and Grounds.
Mr J. Lees, Lithographic Operator, Printery.

Transfer/Promotion
Mrs H. Hasan, Lecturer, Industrial and Administrative Studies

Departures
Dr M. Shuer, Lecturer, Health Sciences.
Ms L.J. Wyatt, Cleaner, Business Services.

TWO IMPORTANT NEW COMMITTEES

Two of the issues targeted for special attention by the EEO Unit in 1988 were:
* conditions of service for part-time general staff and;
* the low numbers of women in academia.

I reported in a previous issue of Campus News on the outcomes of an Open Forum of staff in regard to the second matter — namely, participants wanted the University to be involved in liaison with schools to overcome some of the long-term barriers perceived in the educational system, and more input from women on campus at the University policy level.

To push ahead with these directions I am seeking to establish an Academic Women’s Co-ordinating Committee which will follow-up these outcomes, although the unit will undertake to do any organisation (so please don’t be put off by the thought of too much work to do — we want your ideas most of all).

Similarly, we want to set up a Part Time Employees Sub-Committee to advise on conditions of employment for part-time general staff.

So, volunteers, please call the unit if you can spare even a few hours and are interested in helping in these two important areas.

Other sub-committees set up through EEO in the past -- such as the Disability and Sexual Harassment sub-committees -- have shown just how effective a small group of dedicated people can be.

I look forward to your response.

Kathy Rozmeta
EEO Co-ordinator
Seminars

WOMEN'S STUDIES SEMINAR

Speaker: Sue Rowley (Creative Arts) with readings by Lisa Scott-Murphy (Creative Arts)
Date and Time: June 14, 6.30 pm
Venue: Building 19, room 1034
Inquiries to Sue Uniacke, Department of Philosophy, ext 3604.

DEPARTMENT OF CHEMISTRY

Date and time: Friday June 10, 11.30 am
Speaker: Dr Roger O'Halloran, Melbourne Metropolitan Board of Works
Topic: Chemistry in Motion

Date and time: Friday June 17, 11.30 am
Speaker: Professor N. Kane-Maguire, Furman University, South Carolina, USA
Topic: Electro-generated Chemiluminescence in Transition Metal Systems

For further details please contact Dr G.G. Wallace, ext 3504.

DEPARTMENT OF PSYCHOLOGY

Date and time: Thursday June 9, 12.30 pm
Venue: Social Sciences Building Room 1056 (19.1056)
Speaker: Associate Professor Linda L. Viney
Topic: Interpreting the Interpreters

DEPARTMENT OF BIOLOGY

BIOMEDICAL EVENING SEMINARS
Each seminar will be preceded by a char-grill dinner at 6.30 pm in the Union Bistro. Those interested in attending the dinner should contact Dr E.J. Steele, so that appropriate bookings may be made. Seminars begin at 8 pm in Lecture Theatre G19 Building 35. (The assistance of Dr Stephen Andersen is acknowledged).

June 8. Pharmacia seminar in Plant Molecular Biology. Dr J. Hasselhoff, CSIRO, Division of Plant Industry, Canberra. 

A satellite RNA of a Plant Virus -- Biology and Application.

June 15. Dr Tony Hulbert, Biology Department, The University of Wollongong. 

Physiological development in the Tammar wallaby: A biomedical model.

DEPARTMENT OF BIOLOGY SEMINAR SERIES

Wednesdays 3.30 pm, Building 35, Room G19.
June 8. Professor Andy Beattie, School of Biological Sciences, Macquarie University. 

The evolution of ant-plant interactions.

June 15. Dr Tony Hulbert, Biology Department, The University of Wollongong. 

Physiological development in the Tammar wallaby: A biomedical model.

DEPARTMENT OF MECHANICAL ENGINEERING POSTGRADUATE SEMINARS

Time: 11 am (Friday)
Venue: Department of Mechanical Engineering Seminar Room, Building 8.
June 10
Speaker: Zhihong Gu
Title: The Flow Rate of Coarse and Fine Bulk Solids from Mass Flow Bins

July 1
Speaker: Robert O'Meley
Title: Flow Separation from Bluff Bodies

July 22
Speaker: Mukeschandra Desai
Title: Flowability Assessment of Powders During Pneumatic Conveying

August 12
Speaker: Mohammed Islam
Title: Analysis of Machining Accuracies in CNC Machining Operations.

DEPARTMENT OF PHILOSOPHY

Date and time: Friday June 17, 2.30 pm
Topic: Reasons, Attitudes, and Factive Feelings
Speaker: Dr Robert Dunn, Senior Lecturer, Department of Philosophy, The University of Wollongong
Venue: Department of Philosophy Seminar Room, North Wing, Social Sciences Building, The University of Wollongong (Building 19.1034).

DEPARTMENT OF ECONOMICS

The schedule of Department of Economics seminars to August 1988 are:

June 14

July 26
S. Mark -- Rural income and employment opportunities in the Cimanuk River Basin of West Java.
August 16
D. Kelly -- Workplace industrial relations in the Australian steel industry.

The seminars are informal and speakers will report on completed research as well as work in progress. For further information please contact Dennis O'Brien, ext 3654.

All welcome. Bring your lunch to room 19.2085 at 12.30 pm.

DEPARTMENT OF BIOLOGY

BIOMEDICAL EVENING SEMINARS
Dear Editor,

Re: The first identification of Acquired Intellectual Poverty Syndrome.

Thank you for forwarding the enclosed letter for our independent assessment as to its veracity. Like yourself, we at the Cognitive Science Group here at The University of Wollongong at first suspected that it was a hoax, but our enquiries in the short time available have led us to believe that an AIPS epidemic might in fact be a serious risk.

So far we have been unable to identify your correspondent or even the institution concerned, but careful analysis of the text of the letter makes us concerned that even your correspondent may have unknowingly succumbed to AIPS.

The content of the letter suggests that your correspondent is fixated on universities as the only possible focus of AIPS infection. In the Cognitive Science Group, we have considered the possibility that such an infection could reach pandemic proportions. In order to assess the true extent of the AIPS menace, and to coordinate research into the possible impact on other institutions in our society and on the public generally, we have decided to establish a National Advisory Council on AIPS (NACAIPS), and I have been appointed taskforce chairperson.

Anyone with information which may assist our enquiries in this matter of public interest should contact me at the address below without delay.

Yours sincerely,
Peter G. Burton
Associate Professor
COGNITIVE SCIENCE GROUP
University of Wollongong
NSW 2500 (tel 0420270505)

The letter referred to above follows (Editor)

Sir,

I wish to draw to your readers' attention some observations which suggest that the early stages of a major epidemic are upon us working in the university system. Though not myself an epidemiologist, a number of distressing instances at my own institution and others suggest that reports from abroad of a major threat to life-as-we-know-it may not in fact be exaggerated. The affliction in question may be hereafter referred to (according to international convention) as Acquired Intellectual Poverty Syndrome (AIPS).

Being confined purely to universities, this syndrome has no direct relation to the similar, well known affliction of genetic origin so common in the Public Service. The AIPS syndrome arises not from a genetic defect, since most AIPS sufferers are in fact well endowed genetically, but from a protracted deficiency of nurture. Since this deficiency of nurture includes but is not confined to financial matters, I should perhaps immediately differentiate AIPS from the well known IEPS (Imposed Economic Poverty Syndrome), as publicised in this country in terms of the Henderson Poverty Line. As I understand it the Henderson Poverty Line embodies a Catch-22 element: you are unemployed, have a family to support, and so little money that you can't travel even to the next suburb for a job interview. Naturally nothing like this could exist in universities in this day and age.

The first symptoms of AIPS show as a depression of the morale response caused by protracted exposure to divisive and disorientating rule-making, the imposition of increasingly bureaucratic structures, and the continued avoidance of academic criteria in decision-making in favour of criteria which consolidate the power and influence of those administering (rather than contributing to) the academic enterprise. This phase soon passes.

These early phases of AIPS can seem rather trivial when compared to the later phases, in which insidious destructive changes take hold in the very brain of the AIPS sufferer. Enough is known about the brain these days for your readers to guess that this is a bad news.

There is first a forgetfulness to do research. It begins quietly enough with the patient making out that he or she is fully occupied first with teaching and then with course developments. In the case of teaching, of course, background reading, preparation, consultation with colleagues, lecturing, tutoring and marking of assignments, keeping records, enrolling and advising students, answering their queries and preparing, supervising and marking examinations rarely exceeds 34.5 hr per week and even this is made more convenient by the flextime arrangement to break it up into little pieces of time which can be organised any time of the night or day, leaving plenty of time to concentrate on research.

In the case of course developments there is a ridiculous and pathetic desire continually to change tried-and-true courses. Things like changing entry standards of the students, the need for special courses for students of different preparation and culture background, the need for more courses with industry relevance, the need to adjust for the research findings that have been made by his/her church or reported on the television (by journalists who have access to journals and time to read up on such things) are just some of the reasons quoted by AIPS sufferers when they are in their course-change phase. Surely such mistimed efforts won't increase the employability of graduates? Anyway, as they themselves know--it really just a form of displacement activity to avoid doing any real research.

The sole saving grace to the community in which the AIPS sufferer in these stages resides is that he/she has no trouble at all being accountable; this means that each successive tier of administrators above the AIPS sufferer can keep their noses clean with plenty of interest to report to those to whom they are accountable. (It should also perhaps be said that this reporting leads to financial savings since non-promotion is a little easier when the AIPS sufferer gives him/herself away.)

Sir, in warning your readers to be on the lookout for the AIPS menace, I am happy to report that things are pretty good so far at my own institution. For my own part, the fine I got for parking my non-permit car in the university all day outside my office last Sunday week (while working on a grant proposal) is like water off a duck's back. I am also undaunted by the letter withdrawing my library privileges -- I can still sneak in to look at the journals, I can finish reading the books I've kept out too long, and anyway, I've read the remaining 22 books it has in my field over the past ten years. I have been trying with a new concept, but it'll pass.

At least at my university the Vice-Chancellor has said that research in universities has been 'overemphasised', so the pressure in that direction isn't too great. In fact the Vice-Chancellor is quite a literary person, so it surprised some of us to find a few computers becoming available to some of the staff and students. At first we thought he might be promoting 'computer literacy', but somebody told me that he was interested in genuine literacy! As the story goes, he reckons that if enough AIPS-sufferers can forget about research and just tap-tap-tap-away on their machines, our place can outdo Shakespeare.

Back to the wider issue. Sir, in closing can I beseech one of your readers to look into the suggestion that AIPS is a 'sleeper' disease to which innocent victims are predisposed by excessive exposure to the school system?

Sincerely,
A Concerned Academic,
BSC, PHD, FRCS
(name and address withheld by request)

ACCOMMODATION REQUIRED
A British lecturer and her family seek to rent a house or a flat convenient to the University and suitable for two adults and two young children; July 1 to November 30 (approx). Please contact Dr Gerald Nanson, Department of Geography, ext 3631 or home 846461.

SALE BY TENDER
The University has for sale by tender an Apple IIe monitor complete with external disc drive, micro spooler, buffer interface and Brother HR-15 printer.

SALE BY TENDER
The University has for sale by tender an Apple IIe monitor complete with external disc drive, micro spooler, buffer interface and Brother HR-15 printer.

No guarantee is offered. Terms of sale are cash or bank cheque. For inspection call Mr M. Matthews, ext 3515.

Tenders close 11:30 am June 13 and should be placed in a sealed envelope addressed to Supply Office, The University of Wollongong, PO Box 1144, Wollongong, 2500, and noted on the outside front 'Tender for (description of item)'.

ROOM FOR RENT
International House has available a room for university and faculty visitors. The room has an ensuite and can be furnished with a single or double bed. There is a telephone available for incoming or local outgoing calls. Rates for single occupancy are $35 a night, $75 a week, including breakfast daily.

DIAPER FOR RENT
International House has available a room for university and faculty visitors. The room has an ensuite and can be furnished with a single or double bed. There is a telephone available for incoming or local outgoing calls. Rates for single occupancy are $35 a night, $75 a week, including breakfast daily.

TYPING SERVICES
Get your assignments, letters, resume or report typed by Armel Typing Services. Assignments/Reports: $2.50 per page with copy included. Letters: $3 per page with copy and envelope. Resume: $2.50 per page with copy included. Original Reprints: $1 per page. Phone 287148 and ask for Carmel.
